PATRIOT

Chipper-Shredder-Vac™

When it comes turning big branches into coin sized chips, the Patriot performs. With its outboard bearing, direct drive system, patented rotor design, and easy to sharpen knives, the Patriot will turn your yard waste into valuable compost quickly and efficiently. Convenient features such as a hopper with a built-in handle, side discharge and a standard-equipped collection bag make yard work a breeze. Available in a variety of models from the light weight, eco-friendly electric to the powerful 10HP gasoline model. Patriot's space saving design makes our chippers compact and easy to store.

A NEW PERFORMANCE STANDARD AGAIN

Long-Term Dependability

For stronger rotors, Patriot laminates sheets of steel together — and outperforms wobble-prone, single-plate competitors. Then, Patriot selects tool-quality steel knives of the highest grade, and mounts them on specially angled seats created by a patented process. Now the knives slice rather than chop hard woods for smoother, faster, easier chipping.
