PK0903 - 4" ATV Towable Chipper Shredder
0 37229 99416 2

The Power King PK0915/PK0903 Series Chipper Shredders will chip and shred your tree trimmings, leaves and broken branches into useful mulch. The Electric Start (PK0915-EH) model is easy to start with the turn of a key and also includes an hour meter. The engine spins a weighted drum at around 3000 rpm, feeding the branches and tree limbs, and shoots the chips through a multi-directional chute. These steel blades are double-sided and can be removed, and reversed. The narrow footprint of this unit allows for fitment through residential gates while the included optional wheel base provides better stability while towing with an ATV.

Power King 3" Chipper Shredder now comes with an extra set of blades. Grind your tree-trimmings, leaves and broken branches into useful mulch with the Power King 3 in. 7 HP Chipper Shredder. This powerful and compact machine is powered by a torque-driven 208cc Kohler motor and includes a removable pin hitch bar for towing. The innovated drum design cyclones at 3600 RPM and the Dual material blades can easily be removed for sharpening or replacement. The durable cutting blades are able to shred 3 in. trees down to granules and the large feed chute and omni-direction spout offers flexibility and control for any job. With a blade speed of 2880 RPM, this quality-constructed chipper shredder can help you get your job done. Includes a 3-year limited engine warranty and 1-year Power King chassis parts warranty.

**INCLUDES
REPLACEMENT
TEETH / COVER**

Powered by a strong and reliable 14HP KOHLER Commercial engine, this machine is well balanced to tackle any job. Electric start lets you start the engine with the twist of the key.* Adjustable bow handle lowers and raises for optimal control and for compact storage. Precision control brake holds the left wheel steady so you can easily pivot the machine. Nine Carbide tip grinds the stump quickly and effectively. Front stand to protect the teeth when starting and storing. Centrifugal clutch provides easier starting and cuts power to the grinding wheel for safe release of the front stand. Dual V-Belts transfer power from the engine to grinding wheel efficiently. Large wheels help over rocky terrain. Also has easy to reach locking throttle control and emergency stop button, emergency stop pull cord, and debris guards for safety.

22-TON KINETIC LOG SPLITTER with ABS

- Fast Kinetic Cycle Time
- KOHLER Command Pro CH245
- Easier Maintenance Compare to Hydraulic Splitters
- 22-Ton Splitting Power
- Auto Braking System to Prolong Life of Rack and Spline

Part Number:

PK0322K

0 37229 99151 2

The Power King 22-Ton Kinetic Log Splitter gives you the perfect balance for power and portability. The powerful Kohler 4.5HP Command Pro engine spins the two 25lb flywheels to generate the kinetic force. In a matter of seconds, the flywheels are at max speed and ready to unleash. Once you pull the engagement handle, all of that force is transferred to the ram, and it shoots out at a high rate of speed into the log slamming it into the wedge and splitting the log into 2 pieces. The ram springs back and flywheels are brought up to speed producing a cycle time of only 3 seconds. Faster than any hydraulic splitter around. The raised platform and table of the unit make it easier on your back. The foldable front stand and tow bar support any 2 inch ball for easy towing around the yard. There are no pumps, hydraulic fluid filters, hydraulic fluids to mess around with. The 3 second cycle time and 22-tons of force gets the job done and done quick.

42-TON KINETIC LOG SPLITTER with ABS

- Fast Kinetic Cycle Time
- KOHLER Command Pro CH270
- Easier Maintenance Compare to Hydraulic Splitters
- 42-Ton Splitting Power
- Auto Braking System to Prolong Life of Rack and Spline

Part Number:**PK0342**

0 37229 9306 6

PowerKing is known for its professional equipment that perform with dependability and authority. The PowerKing 42-Ton 7HP ABS Kinetic Log Splitter uses efficient force and speed to out split hydraulic splitters 6 to 1. The kinetic flywheel design eliminates the need for hoses, pumps, valves, cylinders, filters and couplers typically used on hydraulic splitters, making for a much more simpler design. This log splitter is built with heavy steel frame components and includes a heavy-duty tread plate 3 ft. x 4 ft. work table that is perfect for commercial use. The unit has a patent pending Auto Braking System that will automatically stop and reset the system when it is over loaded. This will prolong the life and effectiveness of the unit and its components. This unit includes a worktable, removable hitch, an expansion splitter wedge, a case hardened ram, a 3-year Kohler engine warranty and 1 sec ram speed that allows you to quickly split logs and focus on the job at hand.
