

TRANSFER SWITCHES

Pre-Wired Switch

PRE-WIRED AUTOMATIC TRANSFER SWITCH WITH
BUILT-IN LOAD CENTER

50 Amp, 250 VAC, NEMA 1

Model RTG12EZA1H

*Built in the USA using domestic and foreign parts.

FEATURES

- **The Honeywell Pre-Wired Switch** is designed to operate with the 11kW air-cooled generator. This transfer switch has an integrated load center for picking up the emergency circuits. It is especially useful where the main service is large and only a portion of the building load will be served by the generator. It is available with a built-in 12-circuit load center to supply only those circuits that are essential during an emergency. The pre-wired switch is CUL Listed and suitable for use in optional standby systems (NEC702).
- **The Honeywell Pre-Wired Switch** is housed in a steel NEMA 1 enclosure, with electrostatically applied and baked powder paint. The Heavy Duty Generac® Contactor is a UL recognized device, designed for years of service. The controller at the generator handles all the timing, sensing and exercising functions.
- **CONTACTOR RATING** The transfer switch contactor is rated at 250 VAC and is available in a single phase configuration only.

FUNCTIONS

All timing and sensing functions originate in the generator controller .

• Utility voltage drop-out	<60%
• Timer to generator start	10 second factory set, adjustable between 2-1500 seconds by a qualified dealer*
• Engine warm up delay	5 seconds
• Standby voltage sensor	60% for 5 seconds
• Utility voltage pickup	>80%
• Re-transfer time delay	15 seconds
• Engine cool-down timer	60 seconds
• Exerciser	12 minutes every 7 days

The transfer switch can be operated manually without power applied.

*When used in conjunction with units utilizing Sync 2.0™ controls
