PEAKFLOW iControl

Internet Connected Sump Pump System

PEAKFLOW DataPump

The Smarter Sump Pump System

Fastest Pumps. Smartest Controllers. Anywhere Access.

The iControl is the world's only Internet-connected sump pump system.
The DataPump is equivalent to iControl but without Internet capabilities.

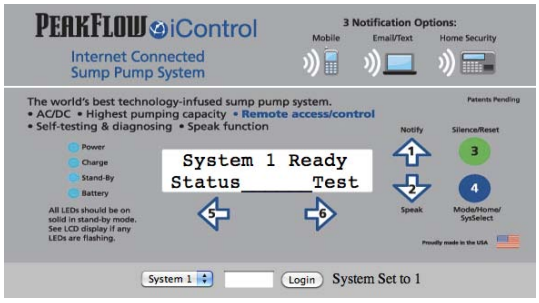
The best flood protection on earth

- **Simple.** Easy-to-understand and operate interface.
- **Monitor.** Free. Third party monitoring available.
- **Adaptable**. Works with existing systems. Built for expansion.
- **Self testing** and diagnosing. Equipment must pass verification 24/7. 16+ detectable alarm conditions.
- **Value.** Better Technology. Better Performance. Lower Price! (than our previous ePump system)
- **Confidence.** American made. Patents Pending. **5-year** warranty!
- **Making a difference.** A portion of the proceeds of this product benefit local charities.

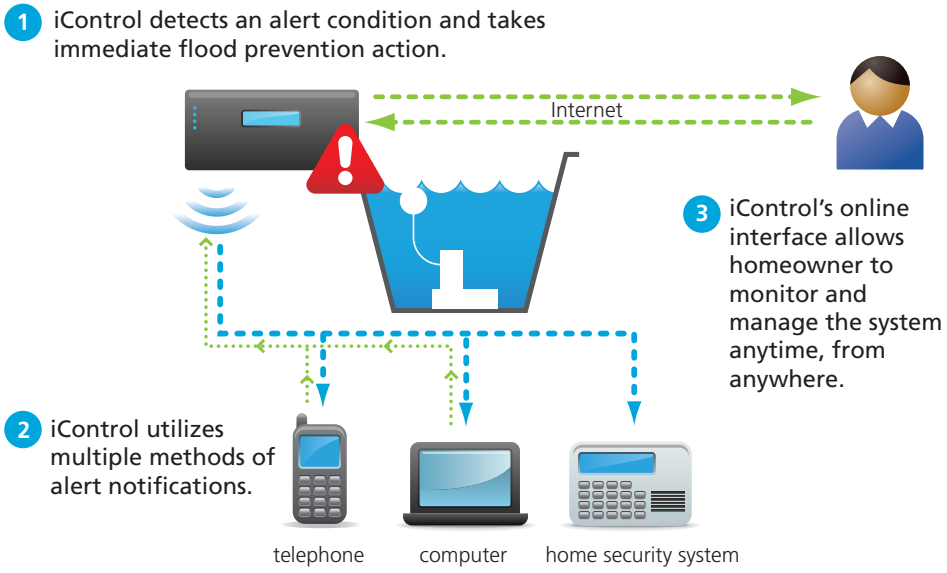
Premium flood protection with Internet monitoring and management

The interactivity you expect from today's technology… built into a sump pump system that leads every industry category.

- **Performance.** Highest output pumps. Highest quality American-made electronics.
- **Full-time protection.** AC/DC operation. Flood protection during power outages or primary pump failure.
- **Management.** Remote management anytime, from anywhere. Features testing and configuration in every possible way to stay informed.



24/7 interface from any Internet connection.



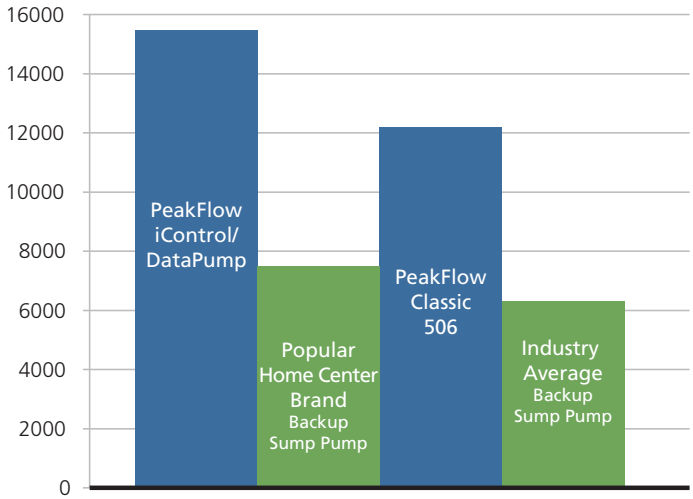
Be informed and in control,
no matter where you are.

iControl/DataPump Specifications:

- Self testing and diagnosing controller
- Internet connectible keypad
- Text, phone, email notification choices
- Free online access for remote monitoring and management
- 43 GPM @ 10´ lift (industry's best!)
- 6 days of power outage run time!
- Over 15,000 gallons pumped from a single battery
- Indestructible, never-corrode pump
- Redundant sensor technology
- Industry best 5-year warranty
- Made in the USA. Patents Pending
- Online interface. Smartphone apps also available! (iPhone, etc.)

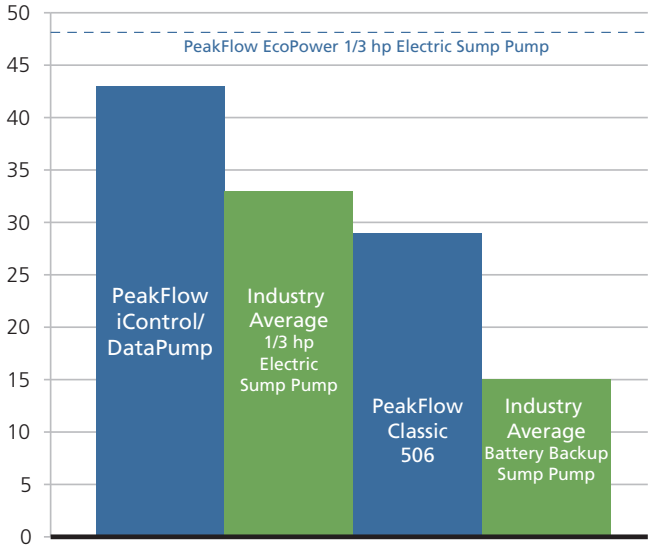
Total Gallons Pumped per Battery*

*Battery=100ah



Gallons per Minute at 10' Lift*

*Industry average compiled from actual capacities, not manufacturers' claims



System Includes:
The PeakFlow controller
The PeakFlow Ethernet keypad (DataPump is a non Ethernet keypad)
The PeakFlow 7 Series pump
1 dual float sensor
1 battery box and misc. accessories

Options:
Dual pump version called X2
Speak accessory
Maintenance free batteries
Competitor conversion kit
Smartphone apps
