

# H4X

REMOTE AIR HUB™

**1 HUB = 4 TOOLS**

## HIGH FLOW

Installing the regulator at the end of your air hose, instead of on the air compressor, allows the air flow to move unrestricted to your work point

## HIGH PRESSURE

Tap directly into the tank with a 1/2" air hose and get the higher unregulated air pressure into your hands faster

## HIGH RECOVERY

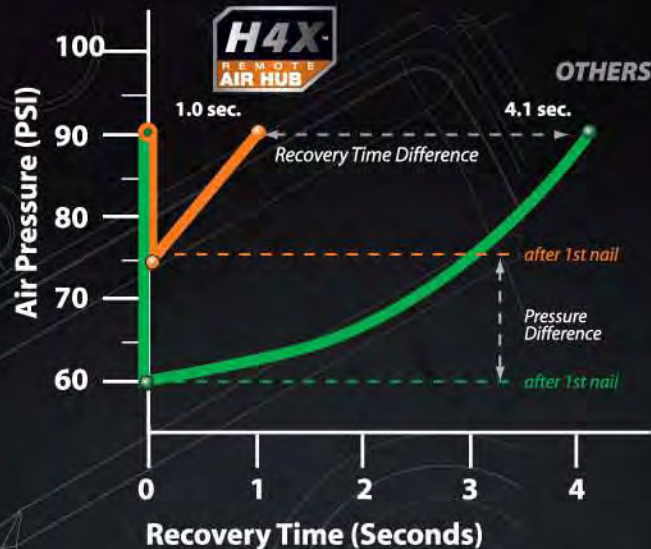

Provides 4 times faster recovery time of pneumatic nailers

## HIGH PRODUCTIVITY

Allows you to run more nailers simultaneously

- No more stepped nails
- Finish your job faster
- Time is Money

# 4X FASTER RECOVERY

50' x 1/2" ID rubber air hose is required to obtain this performance

The Industrial Air Chopper comes equipped with the H4X and a uniquely designed EZ on/off docking station allowing it to operate attached to the compressor or remotely via a 1/2" air hose.
