

The Contractor Sump Buddy

**BACK-UP SUMP PUMP POWERED
BY YOUR MUNICIPAL WATER SUPPLY.**

**NO ELECTRICITY, NO BATTERY,
NO MAINTENANCE REQUIRED.**

**20-70 PSI
OF MUNICIPAL
WATER
PRESSURE
REQUIRED**

300400

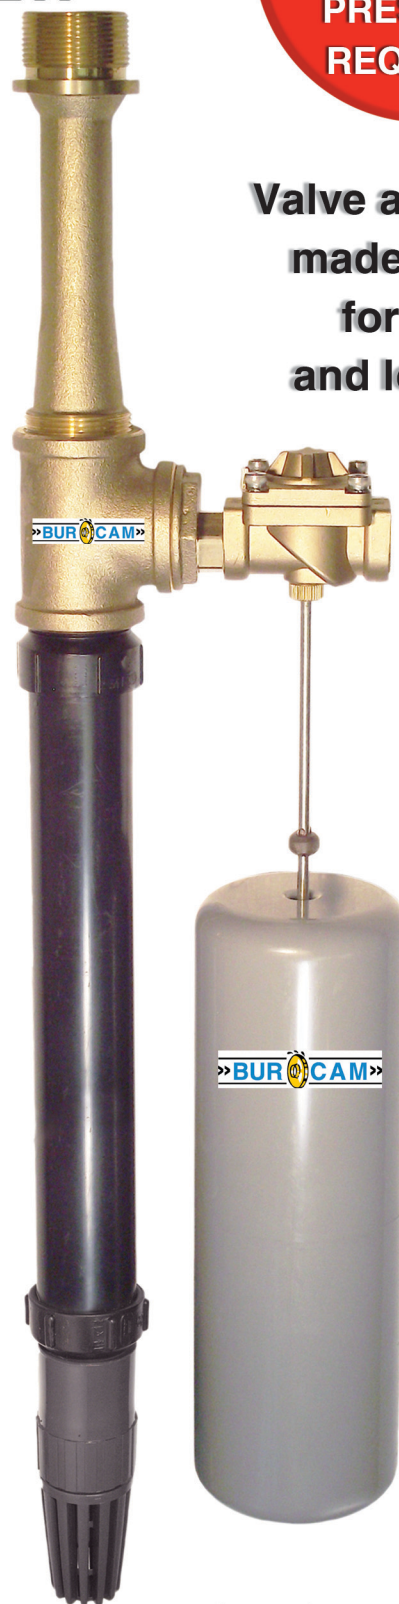

**Valve and pump
made of brass
for strength
and longevity.**

Provides you with peace of mind and helps reduce the risk of flood damage to your property and your valuables.

A **must** for every home owner with municipal water supply, to complement a conventional type sump pump.

For a maximum lift of 15' (4,5m).

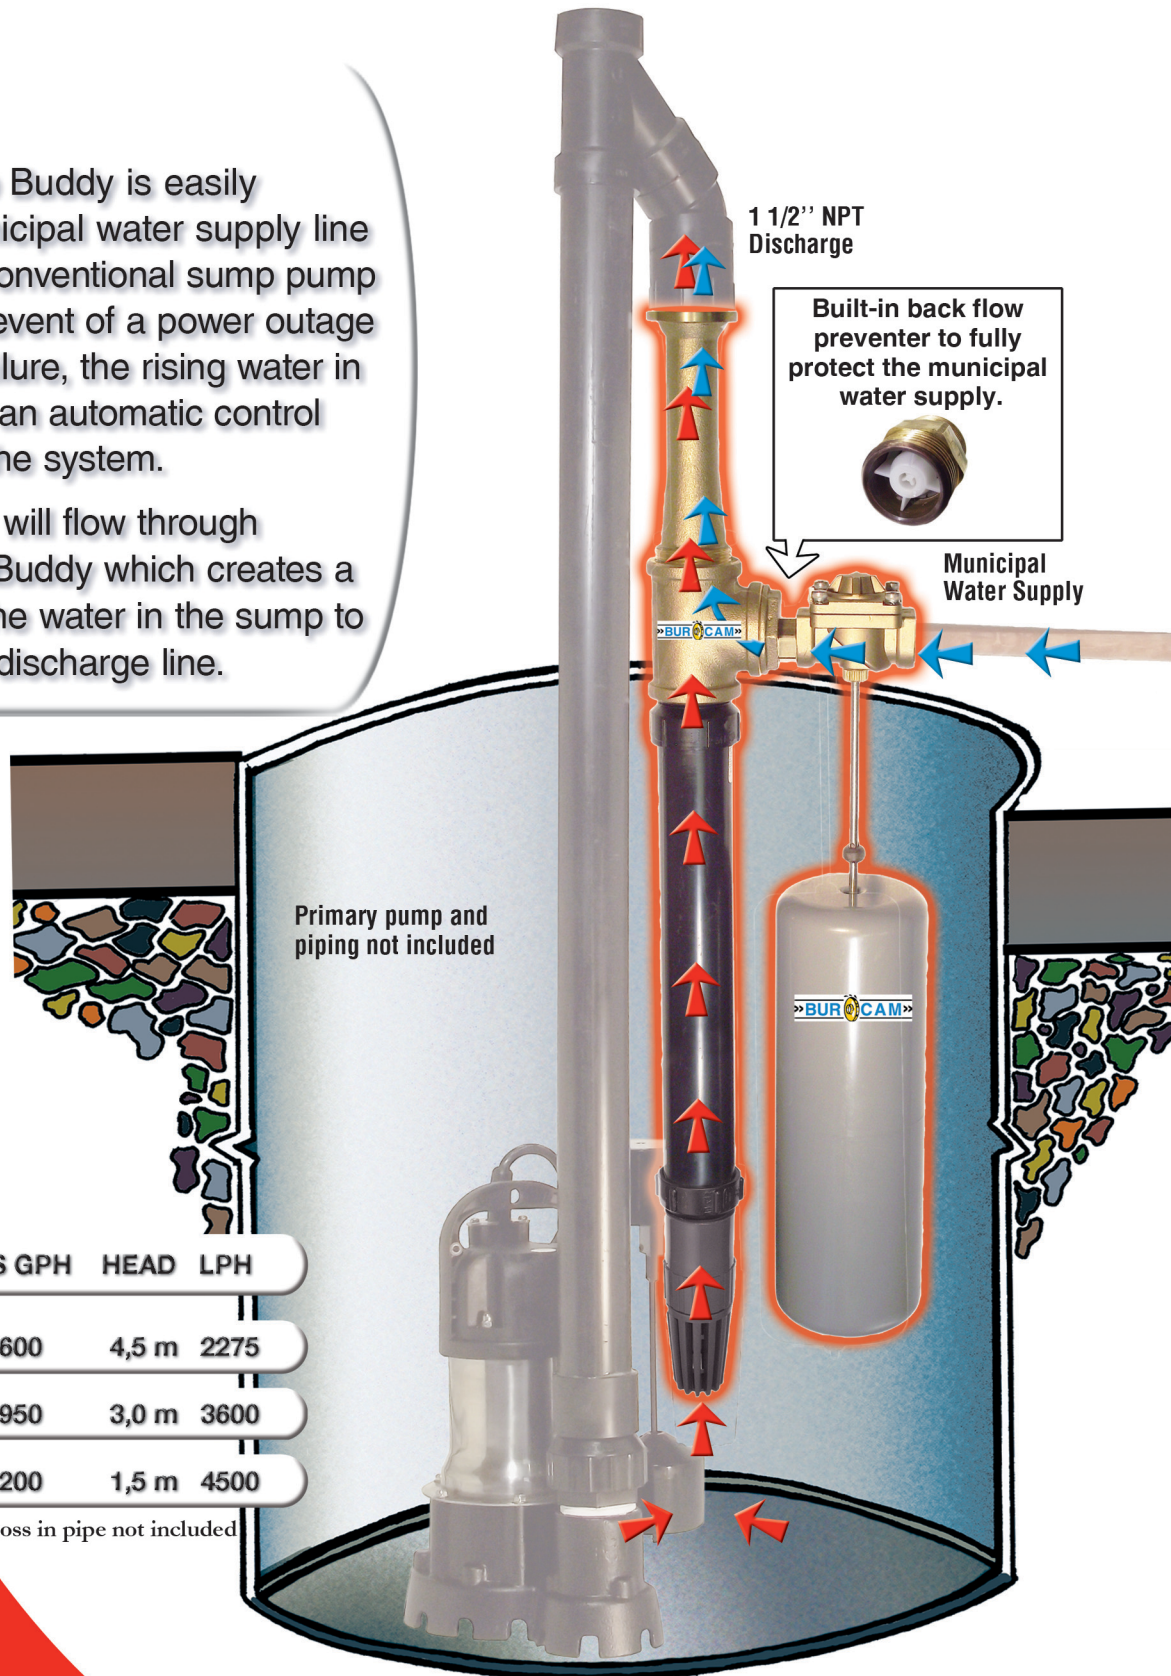

The Contractor Sump Buddy

APPLICATION :

The Contractor Sump Buddy is easily connected to the municipal water supply line and to your existing conventional sump pump discharge line. In the event of a power outage or an electric pump failure, the rising water in the sump will activate an automatic control valve which will start the system.

Water under pressure will flow through the Contractor Sump Buddy which creates a vacuum and causes the water in the sump to be drawn out into the discharge line.
