INSTALLATION

WARNING: ALWAYS block wheels and know all jack stands are strong and secure and will hold weight of unit during maintenance.

CAUTION: On multiblade mowers, rotation of one mower blade will cause all mower blades to rotate.

1. Stop engine, set parking brake, remove ignition key, and wait for all hot parts to cool.
2. Disconnect locking pin from deck and remove discharge chute. Save discharge chute for operating unit without mulch kit. See Figure 2.

3. Remove small discharge baffle from deck. Save baffle and hardware for operating unit without mulch kit. See Figure 3.

4. Lower deck to lowest position and then raise front of unit to expose underside. See detailed instructions in Owner/Operator Manual.
5. Remove tapping screws from mower deck. Save all hardware for operating unit without mulch kit. See Figure 4.

NOTE: 44" decks have eight tapping screws; 52", 60", 66" and 72" decks have nine.

52", 60", 66" & 72" Decks:

Remove nine 3/8-16 x 1/2" tapping screws.

6. Remove bolt and washer retaining blades to spindle and remove blades. Retain all hardware. Save blades for operating unit without mulch kit. See Figure 5.

7. Install mulching blades with spindle hardware removed in Step 6. Torque blade bolt to 115 – 120 lbf-ft (156 – 163 N•m).

8. Install left mulch baffle (Item 3), right mulch baffle (Item 4) and discharge mulch baffle (Item 2) on the mower deck with eight 5/16"-18 nyloc flange nuts (Item 5). See Figure 7.

Figure 6

48" Decks: Install right baffle with one 5/16-18 x 1" hex bolt (Item 6) and one 5/16-18 x 1.5" hex bolt (Item 7). Install left baffle with one 5/16-18 x 1" hex bolt (Item 6). See Figure 7.

60" Decks: Install right baffle with one 5/16-18 x 1" hex bolt (Item 6). Baffle 79401400 requires two 5/16-18 x 1.5" hex bolts (Item 7).

Install left baffle with one 5/16-18 x 1.5" hex bolt (Item 7). See Figure 7.

48" & 60" Decks

*On 48" decks only

Figure 7

52" & 66" Decks: Install right baffle with one 5/16-18 x 1" hex bolt (Item 6). Install left baffle with one 5/16-18 x 1.5" hex bolt (Item 7). See Figure 8.

9. Check for blade clearance and then securely tighten hardware.
10. Return unit to operating position.

FOR BEST PERFORMANCE

- Cut grass when it is dry.
- Keep mower blades sharp.
- Keep mower deck properly leveled.
- Adjust anti-scalp rollers to prevent scalping.
- Do not set height of cut too low. For very tall grass, mow twice.
- Do not travel too fast.
- Mow with engine set at full throttle.
- When mulching, only remove 1/3 of grass length per cutting.
- Vary cutting pattern with each mowing.
- Do not allow grass or debris to collect inside mower deck. Clean after each use.
