Congratulations on your purchase and welcome to the Ariens family! Every machine in the Ariens lineup is designed for long-lasting and unsurpassed performance. We are confident your machine will be part of your family for many years to come.

Have Questions or Need Assistance? ariens.custhelp.com • ariensstore.com

A parts manual for your unit is available for free download or purchase at ariens.com.

PRODUCT REGISTRATION

You or the dealer you purchased the unit from must register the product at the time of purchase. Know the model and serial numbers of your unit and register online at ariens.com or return the registration card to Ariens Company. See Figure 1 for label location.

R	ecord	l mod	lel	num	ber	here.
---	-------	-------	-----	-----	-----	-------

Record serial numbe	r here
---------------------	--------

MANUALS

Before operating or servicing the unit, carefully and completely read the manuals provided with the unit. They contain safety instructions and important information about unit controls.

The engine on this unit is covered by a separate manual. Refer to the engine manual for engine service recommendations. Contact the engine manufacturer for a replacement manual if necessary.

It is your responsibility to read and understand all safety precautions and instructions in the manuals. If you do not understand or have difficulty following the instructions, contact your Ariens dealer for assistance. To locate your nearest dealer, go to ariensstore.com.

DISCLAIMER

Ariens reserves the right to discontinue, make changes to, and add improvements upon its products at any time without public notice or obligation. The descriptions and specifications contained in this manual were in effect at printing. Equipment described in this manual may be optional. Some illustrations may not be applicable to your unit.

SAFETY

Read these safety rules and follow them closely. Failure to follow these rules could lead to loss of control of unit, severe personal injury or death to you or bystanders, or result in damage to property or the machine.

PRACTICES & LAWS

Practice usual and customary safe working precautions. Learn applicable rules and laws in your area. Always follow the practices set forth in this manual.

EMISSION CONTROL SYSTEM

This equipment and/or its engine may include exhaust and evaporative emissions control system components required to meet U.S. Environmental Protection Agency (EPA) and/or California Air Resources Board (CARB) regulations. Tampering with emission controls and components by unauthorized personnel may result in severe fines or penalties. Emission controls and components can only be adjusted by an Ariens Company dealer or an authorized engine manufacturer's service center. Contact your Ariens Company Equipment Retailer concerning emission controls and component questions.

REQUIRED OPERATOR TRAINING

The original purchaser of this unit was instructed by the seller on safe and proper operation. If unit is to be used by someone other than the original purchaser, loaned, rented, or sold, ALWAYS provide this manual and any needed safety training before operation.

WARNING: AVOID INJURY. This cutting machine is capable of amputating hands and feet and throwing objects. Failure to observe the safety instructions in the manuals and on decals could result in serious injury or death.

SAFETY ALERT SYMBOL

This is the safety alert symbol. It means:

- ATTENTION!
- YOUR SAFETY IS INVOLVED!

When you see this symbol:

- BECOME ALERT!
- OBEY THE MESSAGE!

SIGNAL WORDS

The safety alert symbol above and signal words below are used on decals and in this manual. Read and understand all safety messages.

1. Danger

DANGER: Indicates an IMMINENTLY HAZARDOUS SITUATION! If not avoided, WILL RESULT in death or serious injury.

2. Warning

WARNING: Indicates a
POTENTIALLY HAZARDOUS
SITUATION! If not avoided,
COULD RESULT in death or
serious injury.

3. Caution

CAUTION: Indicates a
POTENTIALLY HAZARDOUS
SITUATION! If not avoided, MAY
RESULT in minor or moderate injury. It may also be used to alert
against unsafe practices.

4. Notice

NOTICE: Indicates information or procedures that are considered important but not hazard related. If not avoided property damage could result.

5. Important

IMPORTANT: Indicates general reference information worthy of special attention.

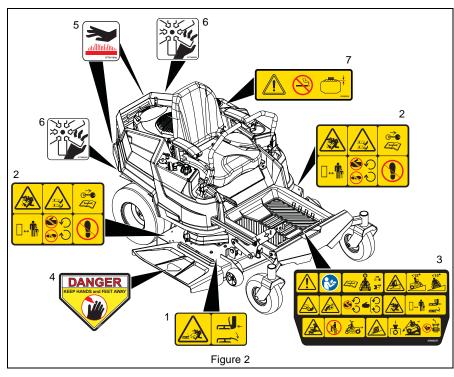

SAFETY DECALS

The safety decals on your machine are visual reminders of the important safety information in this manual. All messages on your unit must be fully understood and carefully followed. Safety decals on the machine are explained below.

ALWAYS replace missing or damaged safety decals. Replacement decal part numbers are found in the parts manual for your machine and may be ordered from your dealer.

See Figure 2 for safety decal locations.

Safety Decal Locations

Safety Decal Descriptions

1. DANGER!

Discharge Hazard -NEVER operate unit without discharge chute in operating position. Thrown objects can cause injury or damage.

DO NOT operate mower unless all guards are in operating position or bagger is attached.

2. DANGER!

Discharge Hazard - NEVER direct discharge toward people, pets or property. Thrown objects can cause injury or damage.

Amputation Hazard -NEVER stick hands or feet under deck or shielded areas.

Shut off engine, remove key, and read manual before servicing or making adjustments to unit.

Keep children and others away from unit while unit is in operation.

Keep feet and hands away from all rotating or moving parts.

DO NOT step or stand in this area.

3. DANGER!

DANGER!

Read and understand the operator's manual before operating unit.

3.1 Amputation Hazard

To avoid amputation hazard DO NOT put hands near rotating blades.

To avoid amputation hazard DO NOT put hands near moving belts.

Keep hands away from all rotating or moving parts.

Keep all guards and shields in place.

3.2 Discharge Hazard

Discharge Hazard - NEVER direct discharge toward people, pets or property. Thrown objects can cause injury or damage.

DO NOT operate mower unless all guards are in operating position or bagger is attached.

3.3 Tipping Hazard

Avoid tipping hazard.

DO NOT operate on slopes over 15°.

DO NOT operate on slopes over 15°.

3.4 Service Hazard

Before servicing unit do the following:

Read owners manual before servicing or making adjustments to unit.

Set parking brake.

Remove key and disconnect spark plug before servicing or making adjustments to unit.

3.5 Bystander Hazard

DO NOT operate the unit in the presence of bystanders.

DO NOT carry passengers.

Look behind when operating the unit in reverse.

3.6 Loss of Traction Hazard

If loss of traction is experienced do the following:

Disengage PTO.

Proceed off slope slowly.

DO NOT try to turn or speed up.

4. DANGER!

ALWAYS keep hands and feet away from discharge chute.

5. HOT PARTS!

DO NOT touch parts which are hot from operation. ALWAYS allow parts to cool.

6. ROTATING PARTS!

AVOID INJURY. Stay clear of rotating parts.

7. DANGER!

DANGER!

No smoking.

IMPORTANT: DO NOT overfill. Fill fuel tank to below bottom of filler neck.

WARNING: Overfilling may cause severe damage to evaporative system!

- NEVER fill fuel tank when engine is running, hot or unit is indoors. NEVER overfill fuel tank.
- Replace fuel cap securely and clean up spilled fuel.

SAFETY RULES

The following safety instructions are based on the B71.1 specifications of the American National Standards Institute in effect at the time of production.

Training

Read, understand, and follow all instructions on the machine and in the manual(s) before starting.

Be sure the area is clear of bystanders and pets before operating. Stop machine if anyone enters the area.

Improper use of power equipment can cause serious permanent injury or death to the operator or a bystander.

Understand:

- How to operate all controls
- · The functions of all controls
- · How to STOP in an emergency
- Braking and steering characteristics
- Turning radius and clearances

If the operator or the mechanic cannot read the manual, it is the owner's responsibility to explain it to them.

ALWAYS train any inexperienced operators and require them to read and understand all manuals and decals.

Only allow responsible adults, who are familiar with the instructions, to operate this machine.

Only the operator can prevent and is responsible for accidents or injuries occurring to themselves, other people or property.

Operator Age

DO NOT allow children under the age of 18 to operate any outdoor power equipment.

Local regulations may restrict the age of the operator.

Data indicates operators age 60 years and above are involved in a large percentage of riding mower-related injuries.

These operators should evaluate their ability to operate the riding mower safely enough to protect themselves and others from serious injury.

Children

Tragic accidents can occur if the operator is not alert to the presence of children. Children are often attracted to the machine and the mowing activity. NEVER assume that children will remain where you last saw them.

Be alert and turn machine off if a child enters the area.

Before and while backing, look behind and down for small children.

NEVER carry children, even with the blade(s) shut off. They may fall off and be seriously injured or interfere with safe machine operation. Children who have been given rides in the past may suddenly appear in the mowing area for another ride and be run over or backed over by the machine.

NEVER allow children to operate the machine.

Use extreme care when approaching blind corners, shrubs, trees or other objects that may block your view of a child.

Keep children out of the mowing area and in the watchful care of a responsible adult other than the operator.

Personal Protection

DO NOT wear loose clothing or jewelry and tie back hair that may get caught in rotating parts.

Wear adequate outer garments.

NEVER wear open sandals or canvas shoes during operation. Wear adequate safety gear, protective gloves and footwear.

Wear proper footwear to improve footing on slippery surfaces.

ALWAYS wear eye and ear protection when operating machine.

Before Operating

Keep all nuts and bolts tight to be sure the equipment is in safe working condition.

Maintain the machine to be in compliance with the maintenance schedule.

Clean grass and debris from unit, especially from around muffler and engine, to help prevent fires.

Check parking brake operation frequently. Adjust and service as required.

Inspect unit before each use for missing or damaged decals and shields, correctly operating safety interlock system, and deterioration of grass catchers. Replace or repair as needed.

Ensure Safety Interlock System is functioning properly. DO NOT operate unit if safety interlock is damaged or disabled.

Start and operate unit only when seated in operator's position. Steering control levers must be in neutral, PTO disengaged and parking brake set when starting engine.

NEVER interfere with the intended function of a safety device or reduce the protection provided by a safety device. Check their proper operation regularly.

Keep machine free of grass, leaves or other debris build-up. Clean up oil or fuel spillage and remove any fuel-soaked debris.

Operation

Be sure the area is clear of bystanders before operating. Stop machine if anyone enters the area.

NEVER operate machine in a closed or poorly-ventilated area.

ALWAYS maintain unit in safe operating condition. Damaged or worn out muffler can cause fire or explosion.

This product is equipped with an internal combustion type engine. DO NOT use unit on or near any unimproved, forest-covered or brush-covered land unless exhaust system is equipped with a spark arrester meeting applicable local, state or federal laws. A spark arrester, if it is used, must be maintained in effective working order by operator.

DO NOT operate machine while under the influence of alcohol or drugs.

DO NOT put hands or feet near rotating parts or under the machine. Keep clear of the discharge opening at all times.

DO NOT touch parts which are hot. Allow parts to cool.

DO NOT operate machine without the entire grass catcher, discharge guard or other safety devices in place and working.

ALWAYS keep hands and feet away from all pinch points.

Avoid slippery surfaces. ALWAYS be sure of your footing.

NEVER carry passengers.

NEVER direct discharged material toward anyone. Avoid discharging material against a wall or obstruction. Material may ricochet back toward the operator. Stop the blade(s) when crossing gravel surfaces.

NEVER engage PTO when attachment, including mower blades, is not in use.
ALWAYS turn off power to attachment when not in active use such as traveling or crossing driveways.

ALWAYS disengage PTO, stop unit and engine, remove key, engage parking brake and allow moving parts to stop before leaving operator's position.

NEVER engage PTO while raising the attachment, including mower blades, or when attachment is in the raised position.

Keep safety devices or guards in place and functioning properly. NEVER modify or remove safety devices.

DO NOT mow in reverse unless absolutely necessary. ALWAYS look down and behind before and while backing.

Stop engine before removing grass catcher or unclogging chute.

Slow down before turning.

If you strike a foreign object, stop and inspect the machine. Repair, if necessary, before restarting.

NEVER leave a running machine unattended. ALWAYS turn off blade(s), set parking brake, stop engine and remove key before dismounting.

Disengage blade(s) when not mowing. Shut off engine and wait for all parts to come to a complete stop before cleaning the machine, removing the grass catcher, or unclogging the discharge guard.

Know the weight of loads. Limit loads to those you can safely control and the unit can safely handle.

Operating Conditions

ALWAYS check overhead and side clearances carefully before operation.

Watch for traffic when operating near or crossing roadways.

Clear the area of objects such as rocks, wire, toys, etc., which could be thrown by the blades.

Check for weak spots on docks, ramps or floors. Avoid uneven work areas and rough terrain. Stay alert for hidden hazards or traffic.

Use care when approaching blind corners, shrubs, trees or other objects that may obscure vision.

Dust, smoke, fog, etc. can reduce vision and cause an accident.

Operate machine only in daylight or good artificial light.

Slope Operation

Slopes are a major factor related to loss of control and tip-over accidents, which can result in severe injury or death. Operation on all slopes requires extra caution. If you cannot back up the slope or if you feel uneasy on it, DO NOT mow it.

DO NOT operate on slopes of more than 15°.

Mow up and down slopes, not across.

ALWAYS keep the machine in gear when going down slopes. DO NOT shift to neutral and coast downhill.

Watch for holes, ruts, bumps, rocks, or other hidden objects. Uneven terrain could overturn the machine. Tall grass can hide obstacles

DO NOT mow on moist or wet grass. Tires may lose traction causing a loss of control.

Use extra care while operating machine with grass catchers or other attachments; they can affect the stability of the machine. DO NOT use on steep slopes.

Keep all movements on the slope *slow* and *gradual*. DO NOT make sudden changes in speed or direction, which could cause the machine to roll over.

Avoid starting, stopping, or turning on a slope. If the tires lose traction, disengage the blade(s) and proceed slowly straight down the slope.

Operation on slopes may lead to loss of steering control. When operating on slopes be prepared to react to an emergency situation:

- Return steering levers to neutral position.
- · Immediately set parking brake.
- · Turn off PTO and engine.

DO NOT try to stabilize the machine by putting your foot on the ground.

DO NOT park on slopes unless necessary. When parking on slope ALWAYS chock or block wheels. ALWAYS set parking brake.

Choose a low ground speed so you will not have to stop or shift while on a slope.

DO NOT mow near drop-offs, ditches, or embankments. The machine could suddenly roll over if a wheel goes over the edge or if the edge caves in.

DO NOT bypass transmission or allow transmission to free-wheel when on a slope.

Fuel

To avoid personal injury or property damage, use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive.

Ethanol blends must not exceed E10. Higher ethanol content may cause your machine to run hotter and damage your engine.

Replace fuel cap securely and clean up spilled fuel before starting engine.

Extinguish all cigarettes, cigars, pipes and other sources of ignition.

Use only an approved gasoline container.

NEVER store the machine or fuel container where there is an open flame, spark or pilot light such as on a water or space heater or other appliances.

NEVER fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. ALWAYS place containers on the ground away from your vehicle before filling.

NEVER fuel the machine indoors.

NEVER remove gas cap or add fuel with the engine running. Allow engine to cool before fueling.

Fuel is highly flammable and its vapors are explosive. Handle with care. Use only an approved gasoline container with an appropriately-sized dispensing spout.

NO smoking, NO sparks, NO flames.

Remove gas-powered equipment from the trailer and refuel it on the ground. If this is not possible, then refuel such equipment with a portable container, rather than from a gasoline dispenser nozzle.

Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until the fueling is complete. DO NOT use a nozzle lock-open device.

NEVER overfill fuel tank. Replace gas cap and tighten securely.

If fuel is spilled on clothing, change clothing immediately.

Towing

Follow the manufacturer's recommendations for weight limits for towed equipment and towing on slopes.

NEVER allow children or others in or on towed equipment.

Tow only with a machine that has a hitch designed for towing. DO NOT attach towed equipment except at the hitch point.

On slopes, the weight of the towed equipment may cause loss of traction and loss of control.

Travel slowly and allow extra distance to stop.

Accessories

Follow the manufacturer's recommendation for wheel weights or counterweights

Check grass catcher components and the discharge guard frequently and replace with the manufacturer's recommended parts, when necessary.

Use only Ariens Company-recommended attachments that are appropriate to your use and can be used safely in your application.

Batteries

Avoid electric shock. Objects contacting both battery terminals at the same time may result in injury and unit damage. DO NOT reverse battery connections.

Reverse connections may result in sparks which can cause serious injury. ALWAYS connect positive (+) lead of charger to positive (+) terminal, and negative (-) lead to negative (-) terminal.

ALWAYS disconnect negative (-) cable FIRST and positive (+) cable SECOND. ALWAYS connect positive (+) cable FIRST, and negative (-) cable SECOND.

Explosive gases from battery can cause death or serious injury. Poisonous battery fluid contains sulfuric acid and its contact with skin, eyes or clothing can cause severe chemical burns.

No flames, No sparks, No smoking near battery.

ALWAYS wear safety glasses and protective gear near battery. Use insulated tools.

ALWAYS keep batteries out of reach of children.

Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the state of California to cause cancer and reproductive harm. Wash hands after handling.

Service

Maintain or replace safety and instruction labels as necessary.

Keep unit free of debris. Clean up oil or fuel spills.

ALWAYS block wheels and know all jack stands are strong and secure and will hold weight of unit during maintenance.

Release any pneumatic or hydraulic pressure from components slowly.

NEVER attempt to make any adjustments to unit while engine is running (except where specifically recommended). Stop engine, remove key and spark plug wire and wait for all moving parts to stop before servicing or cleaning.

Lower cutting deck unless a positive mechanical lock is used.

Allow engine to cool before servicing.

Moving parts can cut or amputate fingers or a hand. On multiblade mowers, rotation of one blade will cause all blades to rotate.

NEVER weld or straighten mower blades.

NEVER make adjustments or repairs with the engine running.

Mower blades are sharp. Wrap the blade or wear gloves, and use extra caution when servicing them.

ALWAYS keep body and hands away from pin holes or nozzles which eject hydraulic fluid under pressure.

Transporting Unit

Use extra care when loading or unloading the machine into a trailer or truck.

Secure unit chassis to transport vehicle. NEVER secure from rods or linkages that could be damaged.

DO NOT transport machine while engine is running.

ALWAYS turn off power to attachment and shut off fuel when transporting unit.

Storage

NEVER store unit with fuel in fuel tank inside a building where any ignition sources are present.

Keep machine free of grass, leaves or other debris build-up. Clean up oil or fuel spillage and remove any fuel-soaked debris. Allow machine to cool before storing.

For extended storage, close fuel shut off valve and clean unit thoroughly. See engine manual for proper storage.

ASSEMBLY

REQUIRED TOOLS

- Adjustable wrench
- · Petroleum jelly or dielectric grease

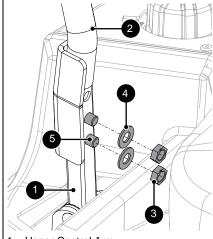

UNPACK UNIT

- 1. Disengage transmission. See *Move Unit Manually* on page 17.
- 2. Move unit from container to a level surface.
- Remove all other pieces from shipping container.
- Cut all packaging cable ties on unit and discard.
- 5. Remove packaging material from unit and discard.

ASSEMBLE STEERING LEVERS

See Figure 3.

- Remove two jam nuts, two flat steel washers and two round head square neck bolts from plastic bag in the shipping container.
- Place steering lever in desired height setting.
 - Use upper and middle holes for highest lever position.
 - Use middle and lower holes for lowest lever position.
- 3. Secure lever to upper control arm with hardware from step 1.
- Repeat steps 1 3 for other steering lever
- 5. Align levers side to side. See *Adjust* Steering Lever Reach on page 28.
- 6. Fully tighten hardware.

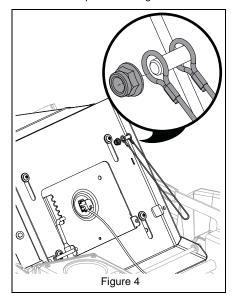

- 1. Upper Control Arm
- 2. Steering Lever
- 3. Jam Nut
- 4. Flat Steel Washer
- 5. Round Head Square Neck Bolt

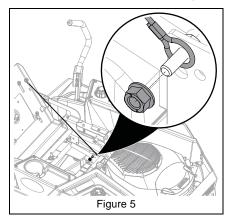

Figure 3

SECURE SEAT CABLE

 Remove nut and one end of seat cable. Reinstall nut to secure remaining cable end to seat plate. See Figure 4.

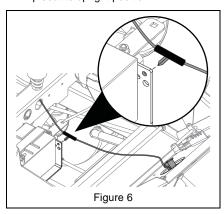

- 2. Remove nut from bolt on battery tray. Retain nut. See Figure 5.
- 3. Tilt seat up slightly so cable end reaches bolt on battery trav.
- 4. Install cable end onto bolt on battery tray and secure with nut removed in step 2.

SECURE OPERATOR PRESENCE **CABLE**

See Figure 6.

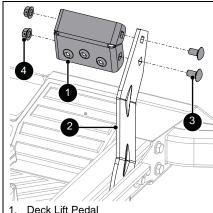

- 1. Insert cable clip into top hole on battery
- 2. Tip seat to upright position.

INSTALL DECK LIFT PEDAL

See Figure 7.

- 1. Remove hardware securing deck lift pedal to unit and remove pedal.
- 2. Rotate pedal as shown in Figure 7 and secure to unit with hardware removed in step 1.

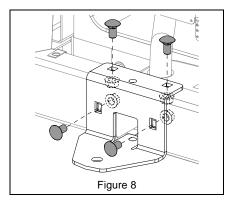

- Deck Lift Arm
- 3. Round Head Square Neck Bolt
- Center Locking Flange Nut

Figure 7

INSTALL TRAILER HITCH

See Figure 8.

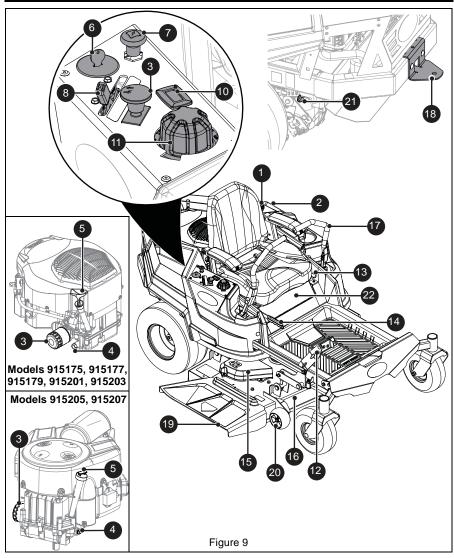

- 1. Remove trailer hitch, four 3/8-16 x 3/4" round head square neck bolts and four 3/8"-16 flange nuts from plastic bag in the shipping container.
- 2. Position trailer hitch over frame as shown in Figure 8.
- 3. Align holes in frame with holes in trailer hitch and secure with hardware from step

PREPARE UNIT FOR OPERATION

- 1. Connect battery. See Install Battery on page 22.
- 2. Adjust seat to a comfortable position. See Adjust Seat on page 27.

CONTROLS AND FEATURES

- 1. Fuel Tank and Cap
- 2. Fuel Level Window
- 3. Oil Filter
- 4. Oil Drain
- 5. Engine Oil Dipstick
- 6. Ignition Key
- 7. Choke Control Knob
- 8. Throttle Control Lever
- 9. Power Take-off (PTO) Knob
- 10. Hour Meter
- 11. Height-of-Cut Dial

- 12. Deck Lift Pedal
- 13. Seat Adjustment Lever
- 14. Parking Brake Lever
- 15. Belt Guard (2)
- 16. Mower Deck
- 17. Steering Lever
- 18. Towing/Trailer Hitch
- 19. Discharge Chute
- 20. Anti-Scalp Wheel (2)
- 21. Transaxle Bypass Lever (2)
- 22. Battery (Under Seat)

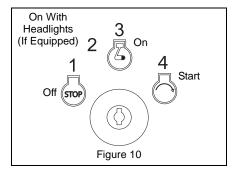

WARNING: AVOID INJURY. Read and understand the entire *Safety* section before proceeding.

IGNITION KEY

See Figure 10.

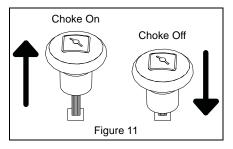

Controls power to the engine. The key cannot be removed when in run position.

CHOKE CONTROL KNOB

See Figure 11.

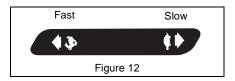

Controls airflow to the engine.

THROTTLE CONTROL LEVER

See Figure 12.

Controls engine speed.

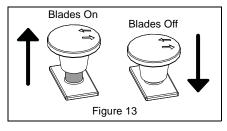

POWER-TAKE-OFF (PTO) KNOB

See Figure 13.

Controls power to mower blades. The engine will not start with the PTO knob in the on position.

WARNING: AVOID INJURY. Blades will not *immediately* stop after pushing PTO knob down to off position.

HOUR METER

Displays the amount of time spent on individual jobs, service alerts, and recommended service intervals.

HEIGHT-OF-CUT DIAL

Sets the mower height of cut.

DECK LIFT PEDAL

Raises or lowers mower deck.

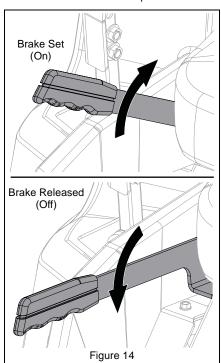

SEAT ADJUSTMENT LEVER

Unlocks seat to allow operator to move seat forward or backward and then lock in desired position.

PARKING BRAKE LEVER

See Figure 14.

Controls the parking brake. The engine will not start with brake in the off position.

SAFETY INTERLOCK SYSTEM

Monitors the interaction of various unit features for operator safety.

STEERING LEVERS

Control the direction and speed of unit. The levers gradually return to neutral when released and are locked in neutral when parking brake is set.

TRANSAXLE BYPASS LEVERS

Control the transaxles so unit may be moved with the engine off.

ANTI-SCALP WHEELS

Help prevent the deck from contacting the ground and scalping the lawn when passing over a high spot.

OPERATION

WARNING: AVOID INJURY. Read and understand the *Safety* section before proceeding.

IMPORTANT: All references to left, right, front or rear are given from the perspective of operator in operator's position, facing the direction of forward travel.

EMERGENCY STOPPING

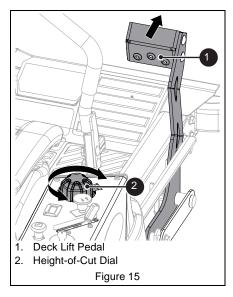

- 1. Move steering levers to neutral position.
- 2. Set parking brake.
- 3. Push PTO knob down to off position.
- Turn ignition key to off position and remove key from ignition.

BEFORE OPERATING UNIT

1. Check fuel level and add fuel if needed.

IMPORTANT: Use fresh unleaded fuel with an octane rating of at least 87. DO NOT use E85 blended fuels; the engine is not E20 / E30 / E85 compatible. The maximum recommended ethanol content is 10%.

- Check engine oil level and add oil if needed. Refer to engine manual.
- Check condition of air cleaner. Refer to engine manual.
- Check function of the Safety Interlock System by performing the tests in *Check* Safety Interlock System on page 19. Contact your Ariens dealer for repair if any of the tests fail.
- 5. Set cutting height. See Figure 15.
 - a. Depress and hold deck lift pedal in forward position.
 - b. Rotate height-of-cut dial to desired setting.
 - Slowly return deck lift pedal to resting position.

START THE ENGINE

- 1. Push PTO knob down to off position.
- 2. Move steering levers to neutral position.
- Set parking brake.
- If engine is cold, pull choke knob up to on position. If engine is warm or hot, turn choke off.
- 5. Set throttle to slow speed.
- Insert ignition key and turn to start position. Release key when engine starts.

IMPORTANT: Do not operate the starter for more than 10 seconds at a time. If the engine does not start, allow a 60-second cool down period between starting attempts.

 If choke is on, wait a few seconds after engine starts and then push choke knob down to off position.

IMPORTANT: Make sure choke is completely off. Engine will not run smoothly using partial choke.

OPERATE UNIT

1. Release parking brake.

WARNING: AVOID INJURY. Move the steering levers slowly and keep the throttle at slow speed until you learn how to operate the unit.

- 2. Set throttle to slow speed.
- 3. Pull PTO knob up to on position.

IMPORTANT: Never engage the PTO if the mower is plugged with grass or other material. This may cause damage to the electric clutch.

4. Move steering levers to begin moving.

Direction of Travel	Lever Position	
Forward	Push both levers forward from neutral position.	
Reverse	Pull both levers backward from neutral position.	
Right Turn	Push left lever farther forward than the right lever.	
Left Turn	Push right lever farther forward than the left lever.	
Stop	Return both levers to neutral position.	

5. Move throttle control lever to fast.

IMPORTANT: Aggressive turning can scuff or damage lawns. Always keep both wheels rotating when making sharp turns. DO NOT make turns with inside wheel completely stopped. For minimum turning radius, slowly reverse inside wheel while moving outside wheel slowly forward.

For Best Mowing Results

- · Cut grass when it is dry.
- · Keep mower blades sharp.
- · Keep mower deck properly leveled.
- Adjust anti-scalp rollers to prevent scalping.
- Do not set height of cut too low. For very tall grass, mow twice.
- · Do not travel too fast.
- · Mow with the engine set at full throttle.
- When mulching, only remove 1/3 of grass length per cutting. Do not cut more than 2.5 cm (1.0") at any one time.
- · Discharge clippings into areas already cut.
- · Vary cutting pattern with each mowing.
- Do not allow grass or debris to collect inside of mower deck. Clean after each use.

STOP THE ENGINE

WARNING: AVOID INJURY. Wait for all moving parts to stop before leaving operator's position.

- 1. Move steering levers to neutral position.
- 2. Set parking brake.
- 3. Push PTO knob down to off position.
- 4. Set throttle to slow speed.
- 5. Turn ignition key to off position and remove key from ignition.

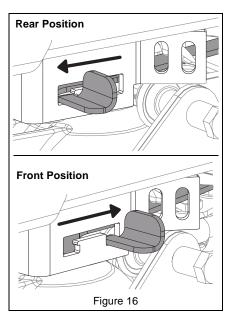

MOVE UNIT MANUALLY

See Figure 16.

IMPORTANT: There is one transaxle bypass lever on each side of unit. Ensure that both levers are fully in front or rear position.

To disengage the transaxles and move unit with the engine off, place both bypass levers in the rear position.

To engage transaxles and operate unit normally, place both bypass levers in the front position.

TRANSPORT UNIT

- Stop engine, set parking brake and remove key from ignition.
- Secure unit chassis to transport vehicle.

NOTICE: NEVER secure from rods or linkages that could be damaged.

MAINTENANCE

WARNING: AVOID INJURY. Read and understand the *Safety* section before proceeding.

Your Ariens dealer can provide service and adjustments to keep your unit operating at peak efficiency.

Contact an authorized engine manufacturer's service center for engine service.

HOUR / MAINTENANCE METER

Hour Meter-only Models

Hour meter measures engine runtime and cannot be reset.

Maintenance Models

See Figure 17.

When the key is in the on position, the Timer mode displays. Press the Mode button to toggle between different modes.

Timer: Measures engine runtime until reset. To reset the timer, press the Mode button to select TMR1 mode and then hold Mode button for 3 seconds.

IMPORTANT: Turn ignition key to the off position when unit is not in use. Some meters may count hours when the key is in the on position, even if the engine is off. This results in inaccurate maintenance intervals.

Service Alerts: Counts down hours until service is needed and displays "Now" when service is due. Service time is measured for:

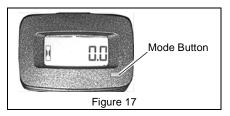

- Engine oil and filter changes (CHG OIL)
- Hydraulic oil and filter changes (CHG H OIL) (Models 915201, 915203)
- Air filter service (SVC AIRFILTER)

The service intervals preset into the hour meter are:

- Hydraulic oil and filter: First 75 hours and every 400 hours thereafter (Models 915201, 915203)
- Engine oil and filter: First 25 hours and every 100 hours thereafter
- · Air filter: Every 100 hours

NOTICE: The preset engine oil services intervals are normal recommended intervals. Specific engine manufacturer's recommendations may vary.

To clear a service message, press the Mode button to select Service Alert mode and then hold the Mode button for 3 seconds.

CHECK SAFETY INTERLOCK SYSTEM

Check function of the Safety Interlock System by performing the tests below. Contact your Ariens dealer for repair if any of the tests fail.

Test	Steering Levers	PTO	Parking Brake	Result	
	St	arting	Interlock		
1	Neutral	Off	On	Engine starts.	
2	Forward, Neutral, Reverse	On	On or Off	Engine does not start.	
3	Forward, Neutral, Reverse	On or Off	Off	Engine does not start.	
	Operating Interlock (Engine On)				
4 *	Forward, Neutral, Reverse	On	On or Off	Engine shuts off.	

Test	Steering Levers	РТО	Parking Brake	Result
	St	arting	Interlock	
5 *	Forward, Neutral, Reverse	On or Off	Off	Engine shuts off.
* When operator lifts off seat.				

CHECK PARKING BRAKE

- 1. Park unit a flat, level surface.
- 2. Move steering levers to neutral position.
- 3. Set parking brake.
- 4. Stop engine and wait for moving parts to stop and for hot parts to cool.
- Set both transaxle bypass levers in the rear position. See Move Unit Manually on page 17.
- 6. Push unit forward.
 - If unit does not move forward, no further action is needed.
 - If unit easily moves forward, adjust the brake lever. See Adjust Parking Brake Lever on page 28.

CHECK ENGINE OIL

NOTICE: Engine oil level must be maintained at correct level or engine damage may occur. Refer to engine manual.

CHECK TIRE PRESSURE

See *Specifications* on page 35 for recommended tire pressure.

WARNING: AVOID INJURY. Explosive separation of tire and rim parts is possible.

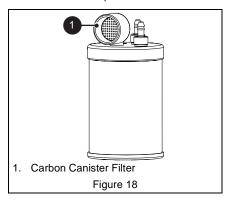

- DO NOT inflate tires above the recommended pressure.
- DO NOT inflate tires with a compressor; use a hand pump.
- DO NOT stand in front of tire assembly when inflating. Use a clip-on chuck and extension hose long enough to allow you to stand to one side.
- DO NOT mount a tire without proper equipment and experience.

CHECK CARBON CANISTER

Model 915179

See Figure 18.

Clean or replace filter whenever engine air filter is cleaned or replaced.

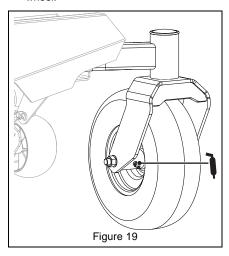

CHECK FASTENERS

Check for loose hardware.

LUBRICATE UNIT

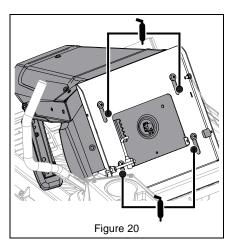

See Figure 19.

Apply grease to grease zerk on each front wheel.

See Figure 20.

- 2. Tip seat forward.
- Apply grease to seat tracks through slots under seat plate.

Return seat to operating position and slide seat back and forth to spread grease along tracks.

MAINTENANCE PREPARATION

Before starting any of the following maintenance procedures:

- 1. Park unit a flat, level surface.
- 2. Move steering levers to neutral position.
- 3. Set parking brake.
- 4. Stop engine and wait for moving parts to stop and for hot parts to cool.
- Disconnect spark plug wires from engine.

NOTICE: Reconnect spark plug wires after maintenance.

CHECK MOWER BLADES

Check blades for wear. Replace or sharpen as needed.

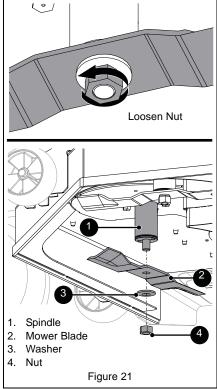

CAUTION: AVOID INJURY. Use sturdy gloves or padding to protect hands when working with mower blades.

Rotation of one blade rotates the other blades.

Remove Blades

See Figure 21.

 Remove hardware securing blades to spindles and remove blades. Retain all hardware for reinstallation.

CAUTION: Unbalanced blades cause excessive vibration and eventual damage to unit. Balance blades before reinstalling on unit. NEVER weld or straighten

3. Check blade balance by sliding blade on an unthreaded bolt. If blade does not remain horizontal, sharpen the heavy end until blade is balanced.

Install Blades

- 1. Reinstall blades, washers and nuts on spindles. See Figure 21.
- 2. Torque bolts to 136 163 Nem (100 - 120 lb-ft).

CHECK BATTERY

WARNING: Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm. Wash hands after handling.

Sharpen Blades

CAUTION: DO NOT sharpen blades while attached to unit.

See Figure 22.

- 1. Remove blades from unit. Discard blades
 - More than 1.3 cm (1/2") of metal is removed.
 - · Air lifts are eroded.
 - · Blades are bent or broken.
- 2. File or grind an equal amount of material from each cutting edge of the blade until sharp. DO NOT change angle of cutting edge or round the corner of the blade.

- 1. Unsharpened Cutting Edge
- 2. Sharpened Cutting Edge

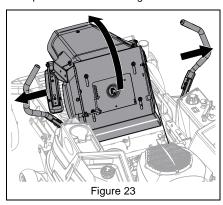

blades.

- 3. 0 1.3 cm (0 1/2) Recession
- 4. Air Lift Erosion Area

Figure 22

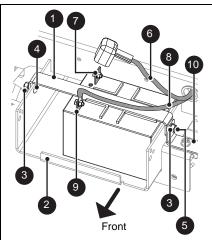

Remove Battery

1. Tip seat forward. See Figure 23.

See Figure 24.

- 2. Disconnect the negative cable and then the positive cable from the battery.
- Remove two hex nuts, the 1/4 x 1/2" bolt, battery hold-down bracket, and battery. Retain all parts for reinstallation.

- 1. Hold-down Bracket
- 2. Battery Tray
- 3. Hex Nut
- 4. 1/4 x 3/4" Bolt
- 5. 1/4 x 1/2" Bolt
- 6. Positive (+) Battery Cable
- 7. Positive (+) Battery Terminal
- 8. Negative (-) Battery Cable
- 9. Negative (-) Battery Terminal
- 10. I Bracket

Figure 24

Install Battery

Install Factory Battery

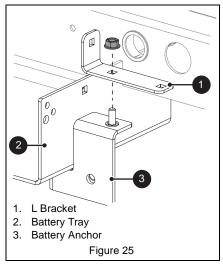

See Figure 24.

- 1. Position battery in battery tray.
- Align upper hole in hold-down bracket over the 1/4 x 3/4" bolt. Position bracket as shown in Figure 24.
- Align hole in hold-down bracket with hole in L bracket and insert the 1/4 x 1/2" bolt through both holes.
- Secure hold-down bracket with two hex nuts.
- Connect positive cable to positive battery terminal and then the negative cable to negative battery terminal.
- 6. Return seat to operating position.

Install U1 Battery

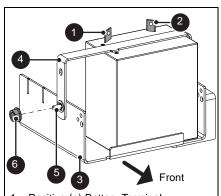

See Figure 25.

 Remove hex nut from L bracket and remove L bracket. Retain all parts for reinstallation.

See Figure 26.

- 2. Install U1 battery into battery tray.
- Insert lower hole in battery hold-down bracket over the 1/4 x 3/4" bolt. Position bracket as shown in Figure 26 and secure with one hex nut.

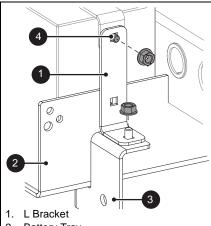

- 1. Positive (+) Battery Terminal
- 2. Negative (-) Battery Terminal
- 3. Battery Tray
- 4. Battery Hold-Down Bracket
- 5. 1/4 x 3/4" Bolt
- 6. Hex Nut

Figure 26

See Figure 27.

- Insert hole in L bracket over bolt as shown in Figure 27 and secure with one hex nut.
- Insert 1/4 x 1/2" bolt though holes in battery hold-down bracket and L bracket and secure with one hex nut.

- 2. Battery Tray
- 3. Battery Anchor
- 4. 1/4 x 1/2" Bolt

Figure 27

- Connect positive cable to positive battery terminal and then the negative cable to negative battery terminal.
- 7. Return seat to operating position.

Clean Battery

- 1. Remove battery from unit. See *Remove Battery* on page 22.
- Clean terminals and battery cable ends with a wire brush.
- Coat terminals with dielectric grease or petroleum jelly.
- 4. Reinstall battery. See *Install Battery* on page 22.

Charge Battery

Check battery with a voltmeter. If battery is less than 11 volts, charge battery.

IMPORTANT: DO NOT fast charge. Charging at a higher rate damages or destroys the battery. ONLY use an automatic charger designed for use with your battery.

IMPORTANT: Always follow information provided on battery by battery manufacturer. Contact battery manufacturer for detailed information about charging.

IMPORTANT: Ariens does not recommend jump starting your unit. Jump-starting can damage engine and system components. Refer to engine manual for detailed information

- 1. Remove battery from unit. See *Remove Battery* on page 22.
- 2. Place battery on bench or other well-ventilated area.
- 3. Connect positive lead of charger to positive battery terminal.
- 4. Connect negative lead of charger to negative battery terminal.
- 5. Charge battery following battery manufacturer's instructions.
- Reinstall battery. See *Install Battery* on page 22.

CHECK MOWER BELTS

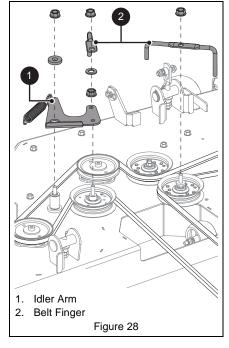

Check belts for wear and replace as needed.

Remove Deck Drive Belt

CAUTION: Keep body parts away from idler when releasing idler spring tension.

- Remove mower deck. See Remove Deck on page 29.
- Remove three self-tapping screws from each belt cover and remove both belt covers. Retain all parts for reinstallation.
- Remove hardware retaining idler arm and two belt fingers from mower deck and remove idler arm and belt fingers. Retain all parts for reinstallation. See Figure 28.

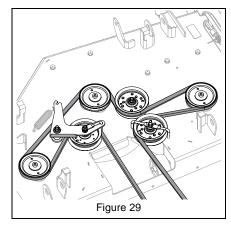

4. Remove deck drive belt.

Install Deck Drive Belt

1. Install deck drive belt. See Figure 29.

NOTICE: Belt will not have tension until routed around drive pulley and idler arm is reinstalled.

- Reinstall idler arm and belt fingers. See Figure 28.
- Reinstall belt covers and secure each with three self-tapping screws removed earlier.
- 4. Reinstall mower deck. See *Install Deck* on page 30.

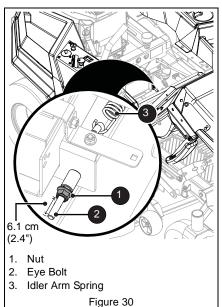

IMPORTANT: Make sure belt has tension and remains aligned after installation is complete.

Remove Ground Drive Belt

IMPORTANT: Retain all parts for reinstallation.

- Remove mower deck. See Remove Deck on page 29.
- 2. Tip seat forward.

3. Loosen nut on eye bolt and disconnect idler arm spring. See Figure 30.

- Remove the right-side self-tapping screw from heat shield and rotate shield out of the way.
- Remove two self-tapping screws from clutch stop bracket and remove bracket. See Figure 31.

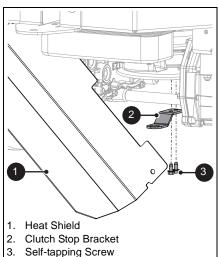

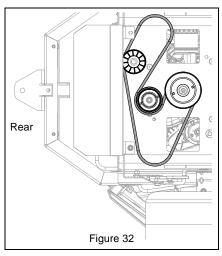

Figure 31

- 6. Disconnect clutch wire.
- 7. Remove ground drive belt.

NOTICE: Route the belt over the top of the pulleys for easiest removal.

Install Ground Drive Belt

1. Install ground drive belt. See Figure 32.

- Reconnect clutch wire.
- Reinstall clutch stop bracket and secure with two self-tapping screws removed earlier.
- Rotate heat shield into position and secure to unit with self-tapping screw removed earlier.
- Reconnect idler arm spring to eye bolt and secure bolt to unit with nut. Tighten until the nut is 6.1 cm (2.4") from the threaded end of the eye bolt. See Figure 30.
- 6. Reinstall deck drive belt. See *Install Deck Drive Belt* on page 24.
- Reinstall mower deck. See *Install Deck* on page 30.

HYDRAULIC FLUID

Models 915201, 915203

Check Hydraulic Fluid Level

See Figure 33.

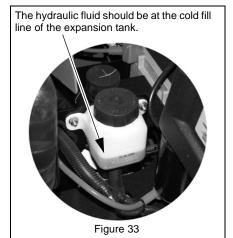

Check the system with the unit cold and parked on a flat, level surface.

Run the unit for about one minute and recheck the levels.

Add Hydraulic Fluid

See Figure 33.

- 1. Remove the cap from the expansion tank.
- Fill the expansion tank with 15W-50 synthetic motor oil (Ariens p/n 00057100) or equivalent until oil level reaches the cold fill line on the tank.
- 3. Reinstall the expansion tank cap.

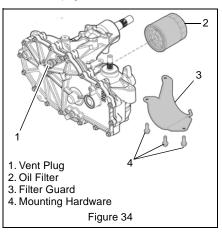

Change Hydraulic Fluid and Filter See Figure 34.

NOTICE: Change hydraulic fluid and filter after the first 75 hours of operation and then every 400 hours. Use 15W-50 synthetic motor oil (Ariens p/n 00057100) or equivalent.

- 1. Place container under oil filter to catch oil.
- 2. Remove the filter guard and oil filter from the transaxle.
- Remove the oil drain plug or fitting from the inlet port and allow the transaxle to drain completely.
- Clean the filter mounting surface and then lubricate rubber gasket on new oil filter with clean hydraulic oil.
- Spin new oil filter onto filter housing until it makes contact. Tighten oil filter another 3/4 turn.
- Install the filter guards removed in step 2. Tighten the mounting screws to 5.38 lb-ft (7.3 N•m).
- Fill with 15W-50 synthetic motor oil (Ariens p/n 00057100) or equivalent until oil appears at the bottom of the drain plug (about 1.89 L (2 quarts) per transaxle). Install the drain plug and tighten it to 20.3 N•m (14.97 lb-ft).

- Repeat steps 1 7 for the other transaxle.
- 9. Follow the instructions in *Add Hydraulic Fluid* on page 26.

Purge Hydraulic System

WARNING: This adjustment requires operating the engine. Use extreme care to avoid contact with moving parts and hot surfaces. Be sure rear of unit is well supported and secure before starting engine.

- With the unit up to and facing a wall, jack up the unit so that both drive wheels are off the ground.
- Disengage the parking brake and put the transaxle bypass levers in the neutral position (see Move Unit Manually on page 17).
- Start the engine and slowly move the steering levers in forward and reverse five or six times.
- Stop the engine and put the transaxle bypass levers in the drive position (see Move Unit Manually on page 17).
- Start the engine and slowly move the steering levers in forward and reverse five or six times.
- Stop the engine, check the oil level and add oil as needed.
- Repeat steps 2 6 until the transaxles operate smoothly in forward and reverse at normal speeds without excessive noise.

ADJUSTMENTS

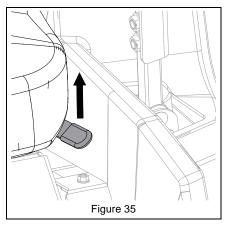

WARNING: AVOID INJURY. Read and understand the Safety section before proceeding.

ADJUST SEAT

See Figure 35.

- 1. Pull seat adjustment lever up to unlock seat.
- 2. Move seat to desired position.
- 3. Release seat adjustment lever to lock seat in place.

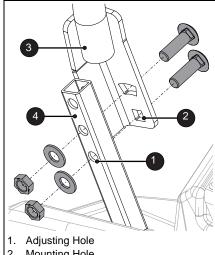

ADJUST STEERING LEVERS

Adjust Steering Lever Height

See Figure 36.

- 1. Remove hardware securing steering lever to upper control arm.
- 2. Place steering lever in desired adjusting hole.
 - Use upper and middle holes for highest lever position.
 - Use middle and lower holes for lowest lever position.
- 3. Reinstall hardware in upper control arm.
- 4. Align levers side to side. See Adjust Steering Lever Reach on page 28.
- 5. Fully tighten hardware.

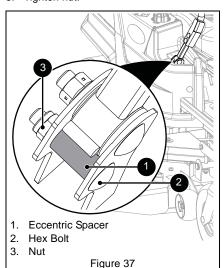

- 2. Mounting Hole
- 3. Steering Lever
- 4. Upper Control Arm

Figure 36

See Figure 37.

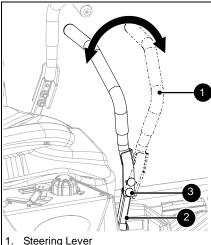

- 6. Loosen nut on hex bolt supporting eccentric spacer.
- 7. Rotate eccentric spacer around hex bolt until levers are at the same height.
- 8. Tighten nut.

Adjust Steering Lever Reach

See Figure 38.

- 1. Loosen hardware securing steering lever to upper control arm.
- Pivot steering lever to desired position. Ensure levers are aligned with each other.
- 3. Tighten hardware.

- 2. Upper Control Arm
- Hardware

Figure 38

ADJUST UNIT TO TRACK STRAIGHT

NOTICE: Reverse travel can only be adjusted by your Ariens dealer.

Check Tire Pressure

- 1. Check pressure of both tires. If needed, adjust pressure to recommendation on tire sidewall.
- 2. Recheck unit tracking. If unit still does not track straight, note which side the unit pulls toward and increase the tire pressure on that side.

IMPORTANT: DO NOT exceed maximum tire pressure listed on tire sidewall.

If increasing tire pressure on one side does not correct tracking problem, adjust the steering levers.

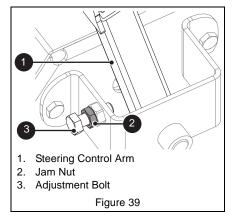

Adjust Steering Levers

See Figure 39.

If adjusting tire pressure did not correct tracking problem:

- 1. Loosen jam nut on adjustment bolt of steering lever that needs adjustment.
- Adjust drive wheel speed.
 - · Turn adjustment bolt counterclockwise to increase steering lever travel and drive wheel speed.
 - · Turn adjustment bolt clockwise to decrease steering lever travel and drive wheel speed.
- 3. Tighten jam nut.

IMPORTANT: Adjustment bolt must contact steering lever. DO NOT turn adjustment bolt too far counterclockwise.

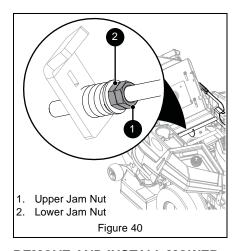

ADJUST PARKING BRAKE **LEVER**

- 1. Park unit a flat, level surface and chock wheels so unit cannot roll.
- Tip seat forward.

See Figure 40.

- 3. Loosen upper jam nut and adjust lower nut up or down until brake lever functions correctly.
- 4. Tighten upper jam nut against lower nut.
- Return seat to operating position.

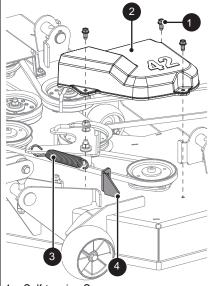

REMOVE AND INSTALL MOWER DECK

Remove Deck

- 1. Set deck to lowest cutting height.
- Position supports, such as wood blocks, under mower deck.

See Figure 41.

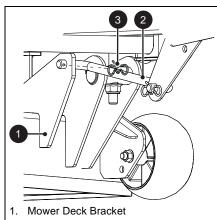

- Remove three self-tapping screws from left belt cover and remove belt cover. Retain all parts for reinstallation.
- 4. Disconnect idler spring from spring bracket to release belt tension.
- 5. Remove deck drive belt from rear drive pulley.

- Self-tapping Screws
- 2. Belt Cover
- 3. Idler Spring
- 4. Spring Bracket

Figure 41

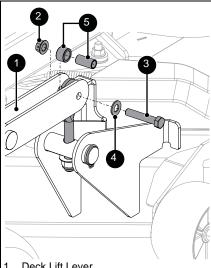

- Remove one hairpin from drag link to disconnect drag link from mower deck bracket. Retain all parts for reinstallation. See Figure 42.
- 7. Repeat step 6 on other side.

- 2. Drag Link
- 3. Hairpin

Figure 42

8. Remove one flange nut, one hex bolt, one flat steel washer and two sleeve bushings from deck lift lever. Retain hardware. See Figure 43.

- Deck Lift Lever
- 2. Flange Nut
- 3. Hex Bolt
- 4. Flat Steel Washer
- 5. Sleeve Bushings

Figure 43

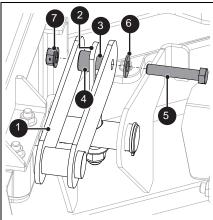

- 9. Repeat step 8 for the three remaining deck lift levers.
- 10. Move deck from under unit.

Install Deck

1. Position deck under unit.

See Figure 44.

- 2. Alian holes in deck lift lever with slot in deck link
- 3. Position one 1/2 x 3/4 x 3/64" (shorter) sleeve bushing between deck link and interior bracket of deck lift lever.
- 4. Insert 3/8 x 1/2 x 1" (longer) sleeve bushing through slot in deck link and shorter sleeve bushing.
- 5. Insert hex bolt through washer, deck lift lever, deck link and sleeve bushings. Secure with flange nut.

- Deck Lift Lever
- 2. Deck Link
- 3. 3/8 x 1/2 x 1" (Longer) Sleeve Bushing
- 1/2 x 3/4 x 3/64" (Shorter) Sleeve Bushina
- Hex Bolt
- 6. Flat Steel Washer
- 7. Flange Nut

Figure 44

- 6. Repeat steps 2 5 for the three remaining deck lift levers.
- 7. Reinstall drag link through mower deck bracket and secure with hairpin removed earlier. See Figure 42.
- 8. Repeat step 7 on other side.
- 9. Secure drive belt around drive pulley.
- 10. Secure idler spring to spring bracket so drive belt has tension.
- 11. Reinstall belt cover and secure with three self-tapping screws removed earlier. See Figure 41.

ADJUST MOWER DECK

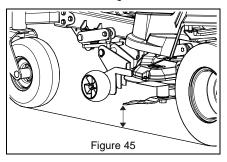

CAUTION: AVOID INJURY. Use sturdy gloves or padding to protect hands when working with mower blades.

Rotation of one blade rotates the other blades.

Level Mower Deck

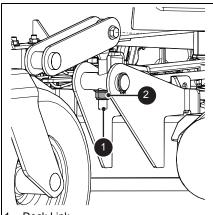

IMPORTANT: Make sure unit is on a flat, level surface and that tires are inflated to the recommended pressure. See *Specifications* on page 35.

- 1. Set deck to highest cutting height.
- Position mower blades so blade ends point left to right across the width of the deck.
- On both sides of the unit, measure the distance to the ground at the cutting edge of the blade. See Figure 45.

- If the measurements are ± 0.635 cm (1/4") of one another, no adjustment is needed.
- If adjustments are needed, adjust the nylon locking flange nut on the deck link. Tighten the nut to raise the deck; loosen the nut to lower the deck. See Figure 46.

IMPORTANT: It may be necessary to adjust the nut on more than one of the deck links.

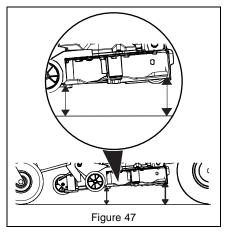

- 1. Deck Link
- Nylon Locking Flange Nut Figure 46

Set Blade Pitch

Pitch is the difference in blade height from front to back.

IMPORTANT: Level the mower deck before setting blade pitch.

- 1. Set deck to highest cutting height.
- 2. Position mower blades so blade ends point front to back.
- On both sides of the unit, measure the distance to the ground at the front and rear tip of the blade. See Figure 47.

- If the front tip of the blade is ± .635 cm (1/4") lower than the rear, no adjustment is needed.
- If adjustments are needed, adjust the nylon locking flange nut on the deck link. Tighten the nut to raise the deck; loosen the nut to lower the deck. See Figure 46.

STORAGE

SHORT-TERM STORAGE

IMPORTANT: NEVER wash unit with high-pressure water or store outdoors.

- 1. Allow unit to cool and clean with mild soap and water.
- 2. Tighten all hardware to correct specifications.
- Inspect unit for visible signs of wear or damage. Repair as needed.

4. Prepare fuel system for storage.

NOTICE: Ariens recommends using a quality fuel stabilizer in all fuel. Gasoline left in the fuel system without a stabilizer, even for short periods of time, deteriorates and leaves gummy deposits in the system that may damage the carburetor and fuel hoses, filter and tank. For the best effectiveness, add stabilizer to all fuel containers whenever purchasing fuel. Add the stabilizer to the container before adding fuel.

- Add fuel stabilizer (see Service Parts on page 18) or equivalent according to manufacturer's instructions to the fuel tank and any fuel containers with remaining fuel.
- Run engine outdoors for at least
 minutes to allow stabilizer to reach the carburetor.

LONG-TERM STORAGE

- 1. Perform short-term storage procedures.
- Lubricate as directed in *Maintenance* on page 17.
- 3. Touch-up all scratched painted surfaces.
- Remove and charge battery as directed in *Charge Battery* on page 23. Store battery in a cool, dry, protected area.
- 5. Store unit in a cool, dry, protected area. Do not store unit outdoors.

START-OF-SEASON PREPARATION

- Before adding fuel for the first time after long-term storage, add fresh, stabilizertreated fuel to fuel tank and any fuel containers with remaining fuel.
- 2. Charge and install the battery.

ACCESSORIES

See your Ariens dealer for a complete list of compatible accessories and attachments for your unit.

Description	Part No.
Mulch Kit – 42"	71513900
Mulch Kit – 52"	71514000

Consumer Mowing Equipment Limited Warranty

Ariens Company (Ariens) warrants to the **original purchaser** that Ariens, Gravely and Countax brand lawn and garden consumer products purchased on or after 1/1/2013 will be free from defects in material and workmanship for the time period noted in the chart below. Equipment put to personal use around a single household or residence is considered "Consumer Use"; equipment put to any business use (agricultural, commercial, or industrial) or used at multiple locations is considered "Commercial Use." If any product is rented or leased, then the duration of these warranties shall be 90 days after the date of purchase.

An authorized Ariens dealer (Ariens brand products), Gravely dealer (Gravely brand products), or Countax dealer (Countax brand products) will repair any defect in material or workmanship, and repair or replace any defective part, subject to the conditions, limitations and exclusions set forth herein. Such repair or replacement will be free of charge (labor and parts) to the original purchaser except as noted below.

Warranty Code	Product Group	Warranty Period Consumer Use	Warranty Period Commercial Use
НА	Zoom & ZT Zero-Turn Riders; AMP™ Rider	3 Years	90 Days
HB	Max Zoom & ZT HD Zero-Turn Riders	3 Years	1 Year
HC	Tractors, "961" Series Walk-Behind Mowers	2 Years	90 Days
HD	Classic LM Series Mowers; Wide Area Walk Mowers; Razor, XD3	3 Years	90 Days
N/A	Service (replacement) Parts	90 Days (no labor)	90 Days (no labor)

Special Extensions

The chart below details special extensions to this warranty:

Warranty Code	Warranty Exception	Warranty Period	Use	Detail
HA, HB	Mower Deck Shell on Zero-Turn Riders	5 Years	Consumer	3 years parts and labor Additional 2 years parts only
HA, HB	Main Frame on Zero-Turn Riders	5 Years	Consumer	3 years parts and labor Additional 2 years parts only
HA	Batteries for AMP™ Rider	2 Years	Consumer	100% first year; prorated second year

Exceptions and Limitations

The chart below details special exceptions to this warranty:

Warranty Code	Warranty Exception	Warranty Period	Use	Detail
All	Batteries	1 Year	Consumer	Prorated
All	Belts, Muffler, Tires	None	Commercial	These components are not covered when used commercially.
All	Cloth, Plastic, and Rubber Components (Including Belts and Cables)	Maximum 2 Years	All	Warranty is limited to 2 years for consumer use. Except as noted above, these components are covered for defect, not for wear.
All	Engines	See Engine Manufacturer's Warranty	All	Engines are covered by engine manufacturer's warranty. Refer to engine manufacturer's warranty statement.

Customer Responsibilities

Register the product immediately at the time of sale. If the dealer does not register the product, the customer must complete the product registration card in the literature package and return it to the Ariens Company, or register the unit online at www.ariens.com, www.gravely.com, www.countax.com. To obtain warranty service, the original purchaser must:

- Perform the maintenance and adjustments explained in the owner's manual.
- Promptly notify Ariens or an authorized Ariens, Gravely or Countax service representative of the need

for warranty service.

- Transport the product to and from the place of warranty service at owner's expense.
- Have the warranty service performed by an authorized Ariens, Gravely or Countax service representative.

To Find an Authorized Service Representative:

Exclusions - Items Not Covered by This Warranty

- Parts that are not genuine Ariens, Gravely or Countax service parts are not covered by this warranty and may void the warranty.
- Damages resulting from the installation or use of any part, accessory, or attachment which is not approved by the Ariens Company for use with product(s) identified herein are not covered by this war-
- The following maintenance, service and replacement items are not covered by this warranty unless they are noted in the Limitations section above: lubricants, spark plugs, oil, oil filters, air filters, fuel filters, brake linings, brake arms, brake shoes, skid shoes, scraper blades, shear bolts, mower blades, mower vanes, brushes, headlights, light bulbs, knives, cutters.
- Any misuse, alteration, improper assembly, improper adjustment, neglect, or accident which requires repair is not covered by this warranty.
- Use of gasoline blends exceeding 10% ethanol voids any and all warranties.

 Products are designed to the specifications in the area that the product was originally distributed. Different areas may have significantly different legal and design requirements. This warranty is limited to the requirements in the area in which the unit was originally distributed. Ariens Company does not warrant this product to the requirements of any other area. Warranty service is limited to service within the area originally distributed.
- In countries other than the United States and Canada, contact the Ariens Company dealer for warranty policies that govern within your country. Rights may vary from country to country and within any one country.

Disclaimer

Ariens Company may from time to time change the design of its products. Nothing contained in this warranty shall be construed as obligating the Ariens Company to incorporate such design changes into previously manufactured products, nor shall such changes be construed as an admission that previous designs were defective.

LIMITATION OF REMEDY AND DAMAGES

Ariens Company's liability under this warranty, and under any implied warranty that may exist, is limited to repair of any defect in workmanship, and repair or replacement of any defective part. Ariens Company shall not be liable for incidental, special, or consequential damages (including lost profits). Some states do not allow the exclusion of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

<u>AUSTRALIAN CONSUMER LAW</u>

The following applies solely to warranties subject to Subsection 102(1) of the Australian Consumer Law: Our goods come with guarantees that cannot be excluded by the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and failure does not amount to a major failure.

DISCLAIMER OF FURTHER WARRANTY

Ariens Company makes no warranty, express or implied, other than what is expressly made in this warranty. If the law of your state provides that an implied warranty of merchantability, or an implied warranty of fitness for particular purpose, or any other implied warranty, applies to Ariens Company, then any such implied warranty is limited to the duration of this warranty. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from region to region.
