

BE IN CONTROL WHEREVER YOU GO.

InfoHubTM wireless monitoring tells you what you want to know about your generator – when you want to know it. Using your computer, tablet or smart phone, standby generator owners can instantly check their generator's system status from home or away.

Monitor standby generator status, track utilization and be aware of any generator maintenance needs before your next power outage.

Choose what you want to know with adjustable standby generator notification settings. Receive emails and text messages on your standby generator's performance.

Set-up standby generator repair by sending maintenance notifications directly to your servicing dealer.

Smart cellular-based system provides broad coverage and a reliable connection to your generator.

InfoHub wireless monitoring takes protecting your home and family from power outages to the next level.

How it works

InfoHub constantly monitors the signal from your standby generator. When the generator's status changes, InfoHub instantly sends an alert to your email or phone.

Custom web platform

User-friendly display makes it easy to monitor and manage your generator.

- Confirm generator status
- Set-up and adjust generator fault, status and maintenance reminder notifications
- Track generator utilization and service history
- View status and locations of multiple generators
- Access service dealer contact information

Instant alerts

Pick and choose what types of notifications you want to receive:

- Generator maintenance or service notifications
- Change in generator status from off to on
- Maintenance reminders

Or you can send generator maintenance alerts directly to your servicing dealer for hands-off repair and trouble-shooting.

Compatibility

InfoHub is designed to work with any Briggs & Stratton® standby generator as of August 2005*.

*Except those that use DeepSea or IntelliNano controllers.
Reference your operators manual.
