Commercial/Industrial Use

This is C-Aire's entry level unit for commercial/industrial applications. This unit features a cast iron pump with a 'V' cylinder design, Swedish Steel Reed Valves, Finned Intercooler Tubes, and large frame heavy duty motor to ensure reliable performance and long life. This unit comes with a pre-wired magnetic starter and is ready for installation and start up.

5 HP Single Phase/230v Motor

- 22 Running amps (Requires 40 amp breaker)
- Pre-wired Magnetic Starter

Large Displacement 2 Cylinder Pump

- Only 836 RPM
- 17.7 CFM @175 PSI
- Solid Cast Iron Cylinders and Crankcase
- Rod inserts and Ball Bearing Mains

80 Gallon Vertical Tank

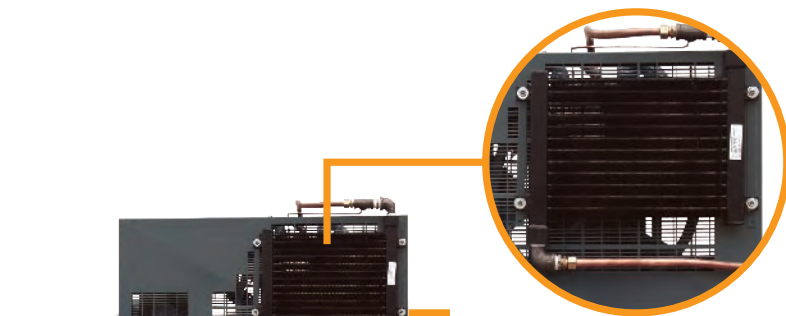

- ASME Certified
- Also available on a horizontal tank

Don't Forget an Installation Kit!

- INSTALL-80V
- Steel Braided Flex Hose
- Ball Valve Drain Kit
- 4 Mounting Pads
- 4 Anchor Bolts

Fully Packaged, Fully Set!

Make sure your C-Aire compressor is set up correctly from the start! C-Aire's Fully Packaged Compressors include a factory installed Belt Guard Mounted Aftercooler and Moisture Minder Auto Tank Drain. This is the most affordable way to significantly reduce moisture and prolong the life and effectiveness of your pneumatic tools by removing approximately 60% of the moisture in your compressed air. Fully Packaged units also include an Installation Kit.

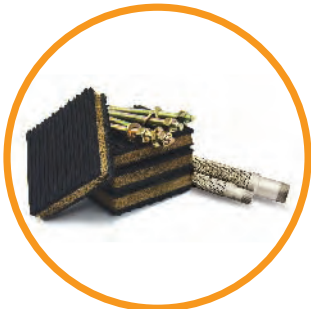

AFTERCoolER

The Aftercooler is mounted directly to the unit's Belt Guard and utilizes the air drawn in by the flywheel for cooling before the air reaches the tank.

AUTOMATIC TANK DRAIN

The Automatic Tank Drain operates each time the compressor cycles, stores condensation without wasting air, prevents valves from fouling and reduces corrosion.

INSTALLATION KIT

4 Mounting Pads
4 Anchor Bolts
Steel Braided Flex Hose
