

# AUTOMOWER® INSTALLATION CHECKLIST

The intent of this checklist is to cover broad elements of an Automower® installation to help the DIY customer achieve a great installation experience. The information is provided as a general guideline. Individual installations will vary so be sure to review the training materials thoroughly.

- Visit **Husqvarna.com** and locate your address on the **Lawn Calculator** to determine the size of the cutting area and that the unit you purchased fits the area needed.
- Identify the location and functionality of outdoor power outlet and its proximity to the desired charge station placement (within 10 yards).
- Contact **Dig Safe** and schedule for the property to be marked for any underground utilities prior to the installation. Please visit **www.call811.com** for more information. If any underground utilities do exist, the appropriate utility company will mark your property to show the locations and types of existing lines free of charge.
- Identify buried lines such as sprinklers, dog fences, etc. that are not typically considered utilities. It is not uncommon for a property to have sprinklers, gas lines to fire pits, perimeter electrical wiring, etc. These are not typically considered utilities and are not likely to be found through locators. Damage from installing the Automower® when these local underground elements are in place is often one of the most difficult situations for an installer and customer to resolve if incidents occurs during the installation.
- Verify the yard is free of all debris such as sticks, toys or obstacles that can cause obstructions.
- Cut the grass to the desired height one to two days prior to the installation.
- Inspect lawn for holes, exposed roots, low drainage areas that may need to be backfilled or have other corrective actions performed.
- Speak with the installer to have a pre-installation site survey visit.
- Your installation kit comes with the basic materials you'll need to complete the installation, including:
  - Loop wire
  - Staples
  - Splicers
  - Connectors
- Check out the following web page for a step-by-step installation guide: <https://www.husqvarna.com/us/lawn-and-garden/how-to-guides/automower-installation/>
- Complete on-line customer satisfaction survey.
