

Dirt Killer Nozzle

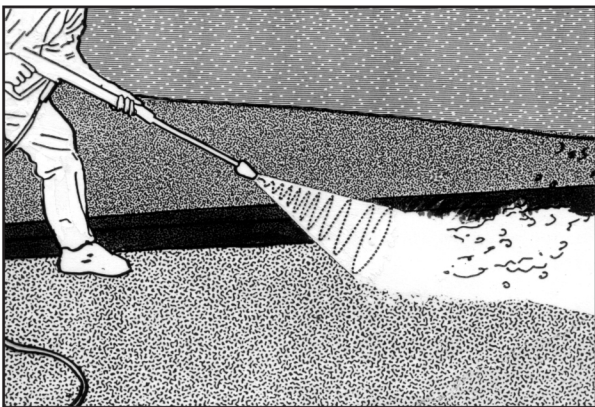

Make your pressure washer twice as powerful with the dirt killer nozzle.

Blast off dirt, mold, loose paint. The nozzle acts like a water blaster making your pressure washer twice as effective. Edge the drive, blast grass out of cracks, clean garbage cans, grills, lawn furniture. The usefulness is limited only by your imagination.

Clean those difficult hard to reach areas like the crevices in wheel covers. Gets objects clean quickly that otherwise would require tedious hand cleaning.

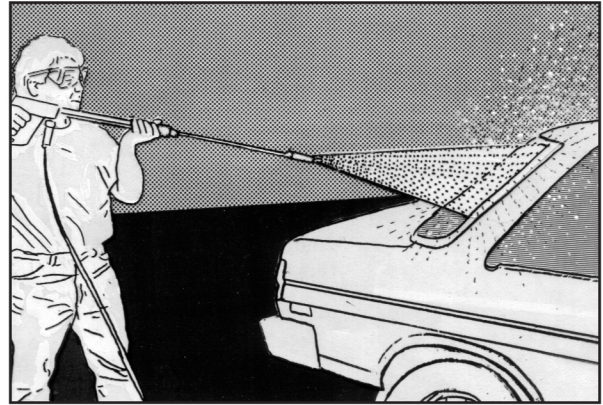

Use the dirt killer nozzle to act like a water powered sweeper. Let the power of the swirling nozzle push the dirt and debris. Acts like a water powered leaf blower.

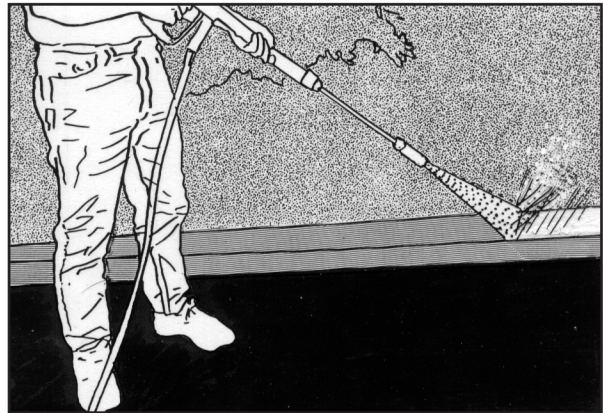

Vario-jet Nozzle

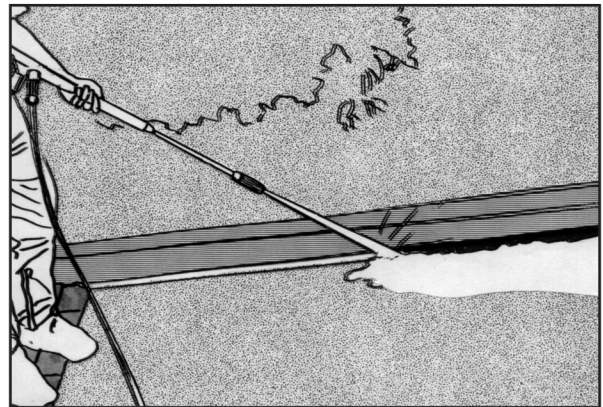

Save time with the convenience of the vario-jet high - low pressure nozzle

Clean by applying soap and rinsing it off with the vario nozzle. Just push the vario forward to have the soap injector begin applying soap. Then push it back to start the high pressure rinse. Wash your car, house or deck quickly without changing nozzles.

Rotate the cover of the vario to adjust the angle of the fan spray to get a narrower fan for greater cleaning power. Clean wood surfaces like curbs, decks, fences. No need to change nozzles just adjust the vario to apply soap and rinse.

Adjust the vario to a zero degree stream. The pinpoint stream of water can be used to clean cracks, and narrow spots that are otherwise hard to reach. This concentrated stream can clean the toughest dirt spots.
