Install a 90%+ high efficiency Peerless gas boiler and receive a \$1500 federal tax credit! Hurry, tax credit ends 12/31/10.

WHY CHOOSE A PEERLESS GAS BOILER?

Healthy Heating

Keep your family, warm, healthy and happy with hydronic heating—the most practical, dependable and efficient home heating method available. Hydronic (hot water) systems heat by convection without the need for fans or blowers. This method of heat transfer is gentler and cleaner than that of furnaces and heat pumps, which circulate dust and allergens through the air.

Peerless® PUREFIRE®

Series MI/MIH

ENERGY STAR® Products

Energy efficient appliances = lower energy bills!

Installing high efficiency Peerless boilers with the ENERGY STAR® rating (over 85% efficient) is both economical and environmentally friendly—especially if your existing boiler has a combustion efficiency of less than 70%. Ask your installer about the Peerless® PUREFIRE®—a 97.3% efficient, ENERGY STAR® rated gas boiler. The direct vent boiler features advanced technology, low emissions and a sealed cabinet to prevent odors and combustion noises.

Radiant Heating

Radiant heating systems heat by circulating hot water through special piping installed in and under floors, in walls and in ceilings. Using a Peerless gas boiler as the main source to heat your radiant system will provide your family with consistent, even heating and the ultimate in home comfort!

Peerless Gas Boilers Offer Many Great Features!

- Clean burning—keeps our environment free of pollutants.
- For use with natural and LP gas systems.
- Quiet in operation—quiet as most home appliances.
- Low profile/compact design—ideal for installations where space is limited.
- Comprehensive warranty—you'll have security and peace of mind with Peerless' complete warranty program for residential boilers (visit **PeerlessBoilers.com** for detailed warranty information).

Cast 92

Peerless® Combi 160

NEW Products!

Ask your heating professional about Peerless Boilers' two new high efficiency products—the Cast 92 cast iron boiler with advanced control board technology and the Peerless® Combi 160 stainless steel boiler which provides heating and hot water in one complete unit!

Domestic Hot Water

For truly efficient water heating, install the Peerless® Partner® indirect-fired water heater which supplies up to five times the amount of hot water as comparably sized electric water heaters. The Peerless Partner utilizes a Peerless gas boiler as its heat source, gently transferring heat energy from the boiler to the water heater through a highly efficient, fin-tube heat exchanger. Easy to install and virtually maintenance free, the Peerless Partner makes a sensible and economical addition to your home heating system.

Peerless® Partner®

Choose Your Heating Professional Carefully.

Selecting a reputable heating contractor is the first step to ensure a reliable home heating system for many years to come. Ask your local heating professional how Peerless Boilers can provide your family with **DEPENDABLE HOME HEATING COMFORT.**
