

Tubing Flow Rates

Operating Pressure
175 psi at 70°F
140 psi at 140°F

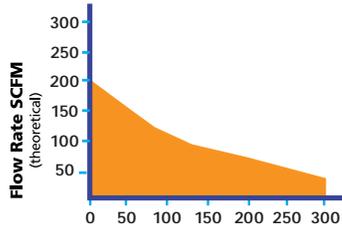

Meets OSHA guidelines

Temperature range
-40°F to 140°F

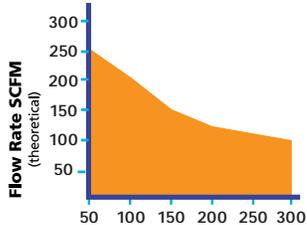

Compatible with common compressor oils

1/2" Maxline (.48 Inside Diameter)
at 150 psi, 10 psi pressure drop

3/4" Maxline (.80 Inside Diameter)
at 150 psi, 10 psi pressure drop

1" Maxline (1.02 Inside Diameter)
at 150 psi, 10 psi pressure drop

Tools and installation

1) CUT the tubing square with the cutter, ROTATING wrist while cutting

2) BEVEL the inside of the tubing by inserting the reaming tool and rotating it at least 3 full turns. Remove nut and split ring from fitting and place on tubing

3) PUSH the fitting onto the tubing and fully against the shoulder of the fitting (soapy water will help this process)

4) TURN the nut finger tight Put a reference mark on the nut and fitting body

5) TIGHTEN nut with wrench a minimum of ONE FULL TURN

RAPIDAIR

MaxLINE

Compressed Air Piping System

WARNINGS:

- Compressed air is dangerous if not used properly.
 - Do not point compressed air source at any part of your body or at any person.
- Always use eye protection when using compressed air.
 - Turn off compressor when not in use.
- CA Prop 65: This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm

- Nickel plated brass
- Double o-ring design
- Split ring allows disassembly
- No expensive tools required

Industrial Sizes

1/2" 3/4" 1"

MaxLINE

Compressed Air Piping System

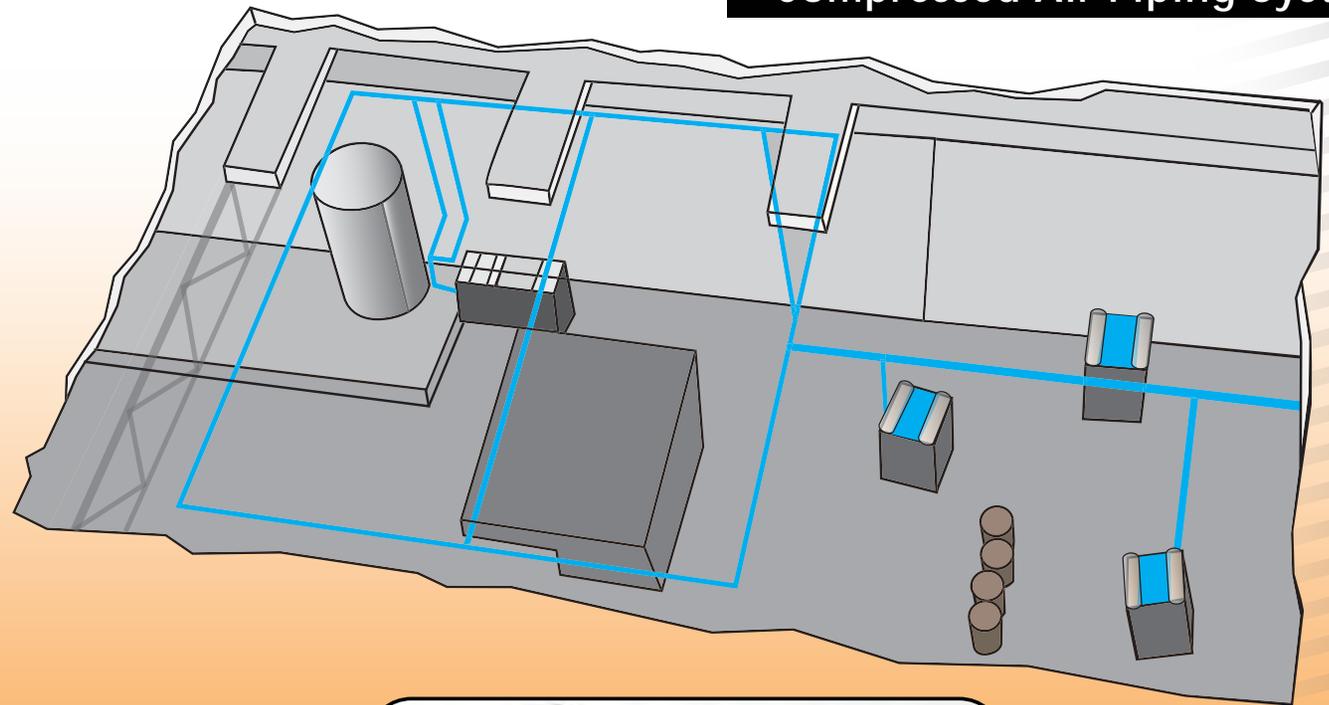

Maxline is an industrial compressed air piping system that is:

- fast and easy to install
- cost effective
- leakproof
- corrosion resistant

Maxline's multilayer construction can be easily bent by hand and maintain its desired shape, giving a professional appearance with no tubing sag. 100 ft and 300 ft rolls allow for faster installation times, with fewer joints. Its smooth interior walls will never build up scale or rust making it an efficient air system.

Maxline piping can be mounted on wall surfaces, in wall for new construction and be directly buried under ground or concrete. This system is easily configured and can be re-modified.

Maxline fittings are nickel plated brass designed for years of long term performance. Its double o-ring compression design is engineered to be a leakproof system, that can be easily disassembled and reused.

Tubing
1/2" 3/4" 1" sizes
100 ft and 300 ft rolls

Holds any bent shape

Variety of fitting choices
adapt to existing systems
with an NPT pipe fitting

Single and Dual Port
Outlets available.
Built in waterdrain
