90	-----	2	*SCREW, Hex Washer, 1/4-15 X 1.00, CZ
91	-----	1	*PLATE, Chute Mounting

⚠ DANGER

Amputation hazard
Contact with moving parts inside chute will cause serious injury.

- Shut off engine before unclogging discharge chute.
- Use clean-out tool, not hands!

Risque d'amputation
Tout contact avec des pièces en mouvement à l'intérieur de la goulotte provoquera de graves blessures.

- Arrêter le moteur avant de dégager la goulotte d'éjection.
- Utiliser l'outil de dégagement, pas les mains!

1737865

301

⚠ DANGER

Shut off engine and remove key before performing maintenance or repair work.

Arrêter le moteur et retirer la clé avant d'effectuer tout entretien ou toute réparation.

Read the operator's manual for operating and safety instructions.

Lire les consignes de sécurité et d'utilisation dans le manuel d'utilisation.

Thrown Objects Hazard

- Never direct discharge chute towards persons or property.

Danger objets projetés

- Ne jamais diriger la chute en direction des personnes ou biens matériels.

Amputation Hazard

- Contact with auger will cause serious injury.
- Keep hands, feet and clothing away.
- Keep bystanders away.

Risque d'amputation

- Tout contact avec la tarière provoquera de graves blessures.
- Tenir vos pieds, vos mains et vêtements à distance.
- Tenir les spectateurs à distance.

This spark ignition system complies with the Canadian standard KC3-002. Ce système d'allumage par étincelle se conforme au standard de sécurité KC3-002 du Canada.

302

STEPS TO EASY STARTING
ÉTAPES POUR UN DÉMARRAGE FACILE

1

Turn engine ON
Mettez le moteur sur « ON » (marche)

2

Turn choke knob to CHOKE
Tournez le bouton de l'étrangleur sur « CHOKE »

3

For COLD engine PRIME 2X
Si le moteur est FROID amorcez-le 2 fois

After engine starts, turn to RUN
Une fois le moteur en marche, mettez-le sur « RUN »

The guides and ruler furnished below are designed to help you select the appropriate hardware.

Standard Hardware Sizing

When a washer or nut is identified as 1/2" (M8), this is the *Nominal size*, meaning the *inside diameter* is 1/2 inch (8mm metric thread diameter); if a second number is present it represents the *threads per inch* (distance between threads).

When bolt or capscrew is identified as 1/2 - 16 x 2" (M8 - 1.25 x 50), this means the *Nominal size*, or body diameter is 1/2 inch (8mm metric thread diameter), the second number, 16, represents the *threads per inch*, (*distance between threads*). The final number is the body length of the bolt or screw, 2 inches (50mm).

NOTES

- These torque values are to be used for all hardware excluding: locknuts, self-tapping screws, thread forming screws, sheet metal screws and socket head setscrews.
- Recommended seating torque values for locknuts:
 - for prevailing torque locknuts - use 65% of grade 5 torques.
 - for flange whizlock nuts and screws - use 135% of grade 5 torques.
- Unless otherwise noted on assembly drawings, all torque values must meet this specification.
