- Super easy installation!

PRODUCT DESCRIPTION

Monitor your outdoor pump or Septic System Level from the the comfort of the indoors. SumpAlarm™ indicates visually and audibly when a pump is not operating as it should by monitoring the water level and sounding an alarm when a high water or pump failure situation occurs.

The large (1 inch) LED indicator light is visible from hundreds of feet away. When a high level alarm condition exists, a flashing red light and 90db horn becomes active (this horn is directional, so please make sure you have it facing your home). Place the float, mount the head unit, plug in the unit, and the installation is complete.
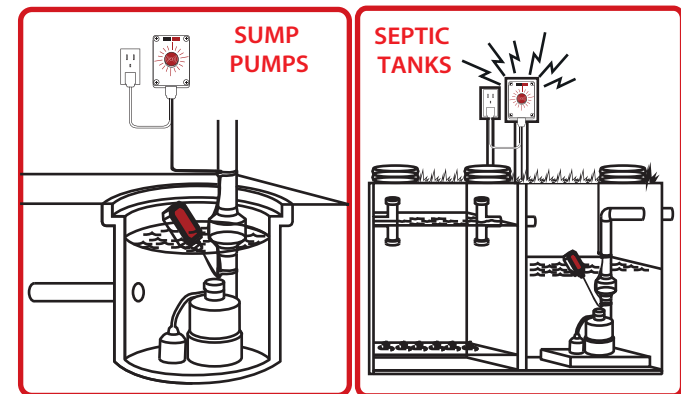

- **Has (4) rear mounting holes for customer mounting. Includes Mounting Feet**
- **Includes wall anchors for head unit, zip ties for floats, and instructions**
- **Mercury Free Float Switch is Rated for 100,000 operations, suitable for use with potable water**
- **It can be used in sump pumps, water tanks, lift stations, low density oils and sewage water**
- **Unit is wired for high level alarm, but can be reversed for low level alarm**
- **110 Volt Units have standard 110 Plug; 220 Volt units have pigtail ends**
