Half Beam

MAX Performance. MAX Value. MAX Support.

Two-Way Gas Log Splitters – Half Beam

Compact, rugged, one-person assembly, easy to maneuver and store – splits logs safely and effortlessly from either side of the machine.

FEATURES & BENEFITS

- Available in 25, 28, 30, and 35 ton force – powered by Briggs & Stratton engines.
- One-person assembly.
- Patent pending log spinner foot plate easily rotates logs for splitting, reducing stress on the beam.
- Patent pending U-Beam structural design is significantly stronger than typical I-Beam design.
- Large 7.5" 2-way wedge powers through the toughest of logs.
- Longer table length to accommodate up to 25.5" logs.
- Oversized hydraulic components provide the shortest cycle time in its class.
- Hydraulic system, structural design, and engine placement allow for easy and safe operation from either side of the machine.
- Centrally located hydraulic reservoir adds to machine stability.
- Hydraulic oil filter is mounted inside the reservoir, eliminating damage from falling logs and operator entanglement.
- Hydraulic cylinder handle offers easy transition from a horizontal to a vertical position.
- Pair of large log cradles – 2-positions, with option for mountable log table.
- Metal fenders included.
